Subd. 18. **Word study.** "Word study" includes instruction in word analysis or syllables, structural analysis or morphemes, and etymology.

Sec. 6. Minnesota Statutes 2023 Supplement, section 120B.12, subdivision 1, is amended to read:

Subdivision 1. **Literacy goal.** (a) The legislature seeks to have every child reading at or above grade level every year, beginning in kindergarten, and to support multilingual learners and students receiving special education services in achieving their individualized reading goals in order to meet grade level proficiency. By the 2026-2027 school year, districts must provide evidence-based reading instruction through a focus on student mastery of the foundational reading skills of phonemic awareness, phonics, and fluency, as well as the development of oral language, vocabulary, and reading comprehension skills. Students must receive evidence-based instruction that is proven to effectively teach children to read, consistent with sections ~~120B.117~~ 120B.118 to 120B.124.

(b) To meet this goal, each district must provide teachers and instructional support staff with responsibility for teaching reading with training on evidence-based reading instruction that is approved by the Department of Education by the deadlines provided in this subdivision. The commissioner may grant a district an extension to the deadlines in this paragraph. Beginning July 1, 2024, a district must provide access to the training required under section 120B.123, subdivision 5, to:

- (1) reading intervention teachers working with students in kindergarten through grade 12;
- (2) all classroom teachers of students in kindergarten through grade 3 and children in prekindergarten programs;
- (3) special education teachers;
- (4) curriculum directors; and
- ~~(5) instructional support staff who provide reading instruction; and~~
- ~~(6) (5) employees who select literacy instructional materials for a district.~~

~~(c) All other teachers and instructional staff required to receive training under the Read Act must complete the training no later than July 1, 2027.~~

(c) The following teachers and instructional staff must complete the training required under the Read Act by July 1, 2027:

- (1) teachers who provide reading instruction to students in grades 4 to 12;
- (2) teachers of multilingual students; and
- (3) teachers who provide instruction to students who qualify for the graduation incentives program under section 124D.68.

(d) Districts are strongly encouraged to adopt a MTSS framework. The framework should include a process for monitoring student progress, evaluating program fidelity, and analyzing student outcomes and needs in order to design and implement ongoing evidenced-based instruction and interventions.

Sec. 7. Minnesota Statutes 2023 Supplement, section 120B.12, subdivision 2, is amended to read:

Subd. 2. **Identification; report.** (a) ~~Twice per year,~~ Each school district must screen every student enrolled in kindergarten, grade 1, grade 2, and grade 3 using a screening tool approved by the Department of Education three times each school year: (1) within the first six weeks of the school year; (2) at midyear; and (3) within the last six weeks of the school year. Students enrolled in kindergarten, grade 1, grade 2, and grade 3, including

multilingual learners and students receiving special education services, must be universally screened for mastery of foundational reading skills, including phonemic awareness, phonics, decoding, fluency, oral language, and for characteristics of dyslexia as measured by a screening tool approved by the Department of Education. The screening for characteristics of dyslexia may be integrated with universal screening for mastery of foundational skills and oral language. A district must submit data on student performance in kindergarten, grade 1, grade 2, and grade 3 on foundational reading skills, including phonemic awareness, phonics, decoding, fluency, and oral language to the Department of Education in the annual local literacy plan submission due on June 15.

(b) Students in grades 4 and above, including multilingual learners and students receiving special education services, who do not demonstrate mastery of foundational reading skills, including phonemic awareness, phonics, decoding, fluency, and oral language, must be screened using a screening tool approved by the Department of Education for characteristics of dyslexia, and must continue to receive evidence-based instruction, interventions, and progress monitoring until the students achieve grade-level proficiency. A parent, in consultation with a teacher, may opt a student out of the literacy screener if the parent and teacher decide that continuing to screen would not be beneficial to the student. In such limited cases, the student must continue to receive progress monitoring and literacy interventions.

(c) Reading screeners in English, and in the predominant languages of district students where practicable, must identify and evaluate students' areas of academic need related to literacy. The district also must monitor the progress and provide reading instruction appropriate to the specific needs of multilingual learners. The district must use an approved, developmentally appropriate, and culturally responsive screener and annually report summary screener results to the commissioner by June 15 in the form and manner determined by the commissioner.

(d) The district also must include in its literacy plan under subdivision 4a, a summary of the district's efforts to screen, identify, and provide interventions to students who demonstrate characteristics of dyslexia as measured by a screening tool approved by the Department of Education. Districts are strongly encouraged to use ~~the~~ a MTSS framework. With respect to students screened or identified under paragraph (a), the report must include:

- (1) a summary of the district's efforts to screen for dyslexia;
- (2) the number of students universally screened for that reporting year;
- (3) the number of students demonstrating characteristics of dyslexia for that year; and

(4) an explanation of how students identified under this subdivision are provided with alternate instruction and interventions under section 125A.56, subdivision 1.

Sec. 8. Minnesota Statutes 2023 Supplement, section 120B.12, subdivision 2a, is amended to read:

Subd. 2a. **Parent notification and involvement.** A district must administer ~~a~~ an approved reading screener to students in kindergarten through grade 3 within the first six weeks of the school year, at midyear, and again within the last six weeks of the school year. Schools, at least biannually after administering each screener, must give the parent of each student who is not reading at or above grade level timely information about:

- (1) the student's reading proficiency as measured by a screener approved by the Department of Education;
- (2) reading-related services currently being provided to the student and the student's progress; and
- (3) strategies for parents to use at home in helping their student succeed in becoming grade-level proficient in reading in English and in their native language.

A district may not use this section to deny a student's right to a special education evaluation.

Sec. 9. Minnesota Statutes 2023 Supplement, section 120B.12, subdivision 4, is amended to read:

Subd. 4. **Staff development.** (a) A district must provide training on evidence-based ~~reading~~ structured literacy instruction to teachers and instructional staff in accordance with subdivision 1, ~~paragraph~~ paragraphs (b) and (c). The training must include teaching in the areas of phonemic awareness, phonics, vocabulary development, reading fluency, reading comprehension, and culturally and linguistically responsive pedagogy.

(b) Each district shall use the data under subdivision 2 to identify the staff development needs so that:

(1) elementary teachers are able to implement explicit, systematic, evidence-based instruction in the five reading areas of phonemic awareness, phonics, fluency, vocabulary, and comprehension with emphasis on mastery of foundational reading skills as defined in section ~~120B.114~~ 120B.119 and other literacy-related areas including writing until the student achieves grade-level reading and writing proficiency;

(2) elementary teachers ~~have sufficient~~ receive training to provide students with evidence-based reading and oral language instruction that meets students' developmental, linguistic, and literacy needs using the intervention methods or programs selected by the district for the identified students;

(3) licensed teachers employed by the district have ~~regular~~ opportunities to improve reading and writing instruction through professional development identified in the local literacy plan;

(4) licensed teachers recognize students' diverse needs in cross-cultural settings and are able to serve the oral language and linguistic needs of students who are multilingual learners by maximizing strengths in their native languages in order to cultivate students' English language development, including oral academic language development, and build academic literacy; and

(5) licensed teachers are ~~well~~ trained in culturally responsive pedagogy that enables students to master content, develop skills to access content, and build relationships.

(c) A district that offers early childhood programs, including voluntary prekindergarten for eligible four-year-old children, early childhood special education, and school readiness programs, must provide staff in early childhood programs ~~sufficient~~ approved by the Department of Education to provide children in early childhood programs with explicit, systematic instruction in phonological and phonemic awareness; oral language, including listening comprehension; vocabulary; and letter-sound correspondence.

Sec. 10. Minnesota Statutes 2023 Supplement, section 120B.12, subdivision 4a, is amended to read:

Subd. 4a. **Local literacy plan.** (a) Consistent with this section, a school district must adopt a local literacy plan to have every child reading at or above grade level every year beginning in kindergarten and to support multilingual learners and students receiving special education services in achieving their individualized reading goals. A district must update and submit the plan to the commissioner by June 15 each year. The plan must be consistent with the Read Act, and include the following:

(1) a process to assess students' foundational reading skills, oral language, and level of reading proficiency and the screeners used, by school site and grade level, under section 120B.123;

(2) a process to notify and involve parents;

(3) a description of how schools in the district will determine the targeted reading instruction that is evidence-based and includes an intervention strategy for a student and the process for intensifying or modifying the reading strategy in order to obtain measurable reading progress;

(b) The district must post its literacy plan on the official school district website and submit it to the commissioner of education using the template developed by the commissioner of education beginning June 15, 2024.

(c) By March 1, 2024, the commissioner of education must develop a streamlined template for local literacy plans that meets the requirements of this subdivision and requires all reading instruction and teacher training in reading instruction to be evidence-based. The template must require a district to report information using the student categories required in the commissioner's report under paragraph (d). The template must focus district resources on improving students' foundational reading skills while reducing paperwork requirements for teachers.

(d) By December 1, 2025, the commissioner of education must submit a report to the legislative committees with jurisdiction over prekindergarten through grade 12 education summarizing the local literacy plans submitted to the commissioner. The summary must include the following information:

Reported the same back with the following amendments:

Delete everything after the enacting clause and insert:

"Section 1. **[2.93] INCARCERATED PERSONS IN DISTRICT PLANS.**

Subdivision 1. Definitions. (a) For the purposes of this section, the definitions have the meanings given.

(b) "Commissioner" means the commissioner of corrections.

(c) "Director" means the director of the Legislative Coordinating Commission.

(d) "Legislative Coordinating Commission" means the Legislative Coordinating Commission established in section 3.303.

Subd. 2. Reallocation and exclusion of incarcerated persons. (a) For purposes of drawing congressional, legislative, and all other election districts, the legislature and local governments must use the population from the federal decennial census as modified by reallocating and excluding persons who are incarcerated.

(b) A person who was incarcerated in a state or federal correctional facility, as determined by the decennial census, and who has a last known address in Minnesota must be reallocated to the census block of the last known address.

(c) A person who was incarcerated in a state or federal correctional facility, as determined by the decennial census, and who has a last known address outside of Minnesota or does not have a last known address must:

(1) be excluded from the population count for purposes of drawing congressional, legislative, or political subdivision districts; and

(2) be counted as part of the statewide population total.

Subd. 3. **Department of Corrections duties.** (a) On or before June 1 in a year ending in zero, the commissioner must provide to the director of the Legislative Coordinating Commission the following information, in electronic form, for each person incarcerated in a state correctional facility on April 1 in the year of the decennial census:

(1) a unique identifier that does not include the person's name, Department of Corrections identification number, or other identifying information;

(2) the street address of the correctional facility in which the person was incarcerated at the time of the report;

(3) the residential address of the person immediately prior to incarceration, if known, or if the person resided in an area lacking a specific physical address immediately prior to incarceration, a description of the physical location where the person regularly stayed immediately prior to being incarcerated;

(4) the following demographic information, if known: the racial and ethnic information collected by the census and whether the person is over the age of 18; and

(5) any additional information the director of the Legislative Coordinating Commission deems necessary.

(b) Notwithstanding any law to the contrary, the commissioner must provide the director with access to the best available data necessary to conduct the reallocations and exclusions required by this section.

Subd. 4. **Federal correctional facilities.** By April 15 in a year ending in zero, the director must request each agency that operates a federal facility in Minnesota that incarcerates persons convicted of a criminal offense to provide the director with a report, including the information listed in subdivision 3. The information must reflect the persons incarcerated in the federal facility on April 1 of that year. If information is provided pursuant to this subdivision, the information must be provided by June 1 of the year ending in zero. If information is not provided pursuant to this subdivision, persons incarcerated at federal facilities must be treated as having no known last address and must be excluded as provided in subdivision 2, paragraph (c).

Subd. 5. **Legislative Coordinating Commission duties.** (a) The director must reallocate and exclude people who are incarcerated in state or federal correctional facilities as provided in this subdivision and subdivision 2. Within 30 calendar days of receiving the Public Law 94-171 data from the United States Census Bureau, the director must post the population counts that reflect all required reallocations and exclusions on the Legislative Coordinating Commission's website.

(b) The director must, in consultation with the commissioner, develop a standardized format and technical guidelines to be used in collecting addresses from incarcerated persons. The commissioner must use this format and follow the guidelines in collecting addresses. The commissioner and the director may enter a memorandum of understanding detailing the additional details regarding the methodology to be used and the format and manner in which the data will be provided. Notwithstanding any law to the contrary, the commissioner must provide the director with access to the best available data necessary to conduct the reallocations and exclusions required by this section.

(c) Prior to reallocating and excluding incarcerated persons, the director must geocode addresses received from the commissioner. When geocoding addresses, the director must accept an address that has an accuracy result of "rooftop" or "range interpolated." The director must reject an address that has an accuracy result of "geometric center" or "approximate." The director must only reallocate those addresses that are accepted pursuant to this paragraph. The director must not reallocate any person at an address that was rejected but must instead count that person as part of the statewide population total.

(d) The director must not disseminate data received pursuant to this section in any manner, except as explicitly required by state or federal law.

EFFECTIVE DATE. This section is effective January 1, 2030, and applies to population counts used for redistricting conducted on or after that date.

Sec. 2. **[241.062] COLLECTION OF INCARCERATED PERSON'S ADDRESS.**

The information must be collected in compliance with the format and guidelines developed pursuant to section 2.93, subdivision 5. An incarcerated person who was participating in the Safe at Home program established in chapter 5B, has safety concerns about providing a last residential address, or has safety concerns for people residing at that address may decline to provide an address.

(b) The incarcerated person's last residential address and the information listed in section 2.93, subdivision 3, clauses (1) to (5), collected on intake and maintained by the commissioner are private data on individuals as defined in section 13.02, subdivision 12.

(2) the following demographic information: the racial and ethnic information collected by the census and whether the person is over the age of 18.

This section only applies to an incarcerated person who was incarcerated prior to the date the commissioner started routinely collecting the information in clauses (1) and (2) as part of the intake process."

(3) any additional health care staff necessary to ensure the care needs can be met of a patient whose behavior may escalate to violence or is violent.

(c) Health care staff who are not members of the violence interruption intervention team:

(1) are not permitted to perform crisis interventions unless the team asks for assistance; and

(2) may support the violence interruption intervention team during a crisis.

(d) When scheduled to serve on the violence interruption intervention team, hospitals must not assign team members any duties or tasks that would prevent the team member from promptly responding to a crisis where behavior may escalate to violence or is violent and immediately participating in an intervention until the resolution of the crisis.

(e) A hospital must treat a response by violence interruption intervention team members as a supplemental emergency service and must not regard the presence of team members on a unit as a replacement for health care staff who would otherwise be assigned to the unit to provide care for the patient who is experiencing a crisis and whose behavior may escalate to violence or is violent, or any other patient on the unit.

Subd. 4. **Critical access hospitals.** A critical access hospital that does not have a behavioral health unit or mental health unit is not required to have a violence interruption intervention team that meets the requirements of subdivision 3, provided the critical access hospital has a staff person available at all times who:

(1) is a licensed medical professional;

(2) is authorized to administer all medications that may be required during a crisis intervention;

(3) completed the trainings required under subdivision 11 and section 144.566, subdivision 10a; and

(4) is able to provide crisis intervention as a violence interruption intervention team would.

Subd. 5. Violence interruption intervention. (a) Hospital staff must seek assistance from the violence interruption intervention team when hospital staff believe that a patient is experiencing a crisis where the patient's behavior may escalate to violence or is violent or that a patient is at imminent risk of such a crisis. Hospital staff may also seek assistance from the violence interruption intervention team when another person in the hospital or on the hospital grounds is experiencing a crisis where the person's behavior may escalate to violence or is violent, or is at imminent risk of such a crisis.

(b) A member of the violence interruption intervention team must respond promptly and in person to all requests for assistance from the team.

(c) For each crisis intervention, one violence interruption intervention team member must be designated the team lead. The team lead must determine what intervention method is most appropriate and promptly organize an intervention plan.

Subd. 6. Violence interruption intervention follow-up; violence interruption intervention team responsibilities. After a crisis intervention, the violence interruption intervention team must conduct an informal debriefing to determine if: (1) policies and procedures were followed prior to and during the intervention; (2) the best outcome for the patient was achieved; and (3) improvement to the intervention process is needed to better serve the needs of patients experiencing a crisis where the patient's behavior may escalate to violence or is violent. The violence interruption intervention team may make recommendations to the hospital administration for improving crisis interventions in the future.

Subd. 7. Violence interruption intervention follow-up; care team responsibilities. (a) After a crisis intervention, the care team of the patient who experienced the crisis must review the patient's care plan and implement an updated person-centered care plan to minimize the chances of a recurrence of a crisis where the patient's behavior may escalate to violence or is violent. When preparing the updated care plan, the care team must consult the patient's physician to determine if the patient's treatment plan needs to be adjusted.

(b) The patient's updated care plan must:

(1) address in observable and measurable terms where, when, and with whom the crisis occurred and determine if adjustments to the patient's care, care team, or environment are necessary to minimize known antecedents and triggers of the patient's prior crises where the patient's behavior was violent or was at risk of escalating to violence;

(2) include what interventions and strategies were previously implemented to prevent the patient from experiencing a crisis where the patient's behavior may escalate to violence or is violent and the efficacy of those interventions and strategies;

(3) provide recommendations on the best de-escalation strategies for the patient; and

(4) set a staffing level and patient status observation schedule for the patient to ensure the care plan is followed and the patient's needs are met in a timely manner.

(c) The care team must evaluate the patient's care plan at least weekly to ensure the care plan continues to be appropriate for the patient.

(d) The care team of the patient who experienced the crisis must ensure all care plans are appropriately transferred if the patient's care is transferred to other health care staff or to a different unit or facility.

Subd. 8. Violence interruption intervention follow-up; hospital responsibilities. After a crisis intervention, the hospital administration must:

(1) provide options for affected staff to leave their shift and return to work when they are fit to do so;

(2) ensure the patient's electronic health record is modified to display a conspicuous notice alerting members of the patient's care team that the patient recently experienced a crisis requiring a response from the violence interruption intervention team, and ensure that this notice is removed from the patient's electronic health record once seven days elapse without the patient experiencing such a crisis;

(3) contact affected staff to provide support and referrals to employee assistance plans, mental health programs, and other available resources;

(4) conduct a thorough investigation of the circumstances precipitating the crisis, including staffing levels at the time of the crisis, and documenting direct care staff concerns about staffing levels;

(5) provide recommendations to the workplace violence prevention action plan team under section 144.566 for remedial action and remedies around staffing levels;

(6) review incidents, staffing levels, and documentation to ensure crisis prevention strategies are implemented and added to the workplace violence prevention action plan under section 144.566;

(7) submit a violence incident report to the workplace violence prevention action plan team under section 144.566; and

(8) submit to the workplace violence prevention action plan team any recommendations for improving crisis interventions in the future that the violence interruption intervention team may have submitted to the hospital administration under subdivision 6.

Subd. 9. Required violence interruption intervention policies. All hospitals must adopt and implement policies governing a violence interruption intervention team's response when hospital staff believe a patient is experiencing a crisis where the patient's behavior may escalate to violence or is violent or believe a patient is at imminent risk of such a crisis. The violence interruption intervention policies must include the names or job titles of the hospital staff responsible for implementing the violence interruption intervention policies. The violence interruption intervention policies must include procedures for:

(1) creating a violence interruption intervention team that meets the requirements of subdivision 3;

(2) identifying and assessing a patient's condition to determine the need for response or intervention by a violence interruption intervention team member;

(3) ambulance personnel to request that a violence interruption intervention team be available to assist when the ambulance arrives at the hospital;

(4) training all hospital staff to seek assistance from the violence interruption intervention team when appropriate or to call emergency services;

(5) training of violence interruption intervention team members that meet the requirements of subdivision 11;

(6) ensuring at least one member of the violence interruption intervention team listed in subdivision 3, who is a licensed medical professional and authorized to administer all medications that may be required during a crisis intervention, is available on site at all times to respond promptly to any crisis that occurs in the hospital where a patient's behavior may escalate to violence or is violent, including a requirement that a violence interruption intervention team member is not considered available if the team member has been assigned any duties or tasks that would prevent the team member from promptly responding to a crisis and immediately participating in an intervention until the resolution of the crisis;

(7) a violence interruption intervention team's timely response to a request for assistance;

(8) evaluating a patient experiencing a crisis where the patient's behavior may escalate to violence or is violent, for substance use treatment and counseling and to provide guidance on that treatment and counseling;

(9) ensuring the provision of linguistically and culturally competent behavioral health crisis intervention services to patients;

(10) reporting concerns by hospital staff regarding the availability of violence interruption intervention team members and concerns regarding the availability, condition, storage, and maintenance of equipment; and

(11) coordinating implementation of the requirements of this section with the workplace violence prevention plan adopted by a hospital under section 144.566, including methods of reporting and investigating any incidents of workplace violence that result from a patient's crisis.

Subd. 10. **Required safety procedures.** All hospitals must adopt and implement safety procedures for situations in which the risk posed by a crisis where a patient's behavior may escalate to violence or is violent exceeds the ability of the violence interruption intervention team to safely intervene. The safety procedures must be created by the violence interruption intervention team with input from direct patient care staff. The safety procedures must include:

(1) mechanisms to provide appropriate intervention when health care staff are concerned about confronting a suspected perpetrator of abuse or concerned for their own safety, such as when a person is wielding a deadly weapon;

(2) standards for determining when and how to inform all impacted health care staff of potential life-threatening circumstances in the hospital; and

(3) standards for determining when to call security or law enforcement to respond to an incident.

Subd. 11. **Required training for violence interruption intervention team members.** (a) All hospitals must ensure that all members of a violence interruption intervention team receive training and education on a continuing annual basis to ensure competency in existing and new skills in psychiatric care, crisis intervention, substance use treatment services, providing trauma-informed care, and ensuring access to linguistically and culturally competent care.

(b) The training and education required under this subdivision must include opportunities for interactive questions and answers between violence interruption intervention team members and a person knowledgeable about the hospital's violence interruption intervention policies.

(c) The training and education required under this subdivision must be conducted during the normal working hours of the participating team member unless the team member receives at least the normal hourly wage for any additional time spent in the training and education sessions. Training must be conducted only when participating team members are not scheduled to provide patient care.

Subd. 12. **Violence interruption intervention program implementation requirements.** (a) All hospitals must designate as a violence interruption intervention director a licensed medical professional who: (1) has experience and competence in psychiatric services; (2) is either a registered nurse or a physician; and (3) is responsible for the implementation of the requirements of this section.

(b) The violence interruption intervention director must ensure that the policies adopted under subdivisions 9 and 10 are developed, implemented, and annually reviewed with meaningful input and active involvement of the following hospital staff, including hospital staff with a recognized collective bargaining agent or agents:

(7) any other hospital staff required to be present in a patient care area who are reasonably anticipated to require a response by a violence interruption intervention team.

(c) The violence interruption intervention director must ensure that the programs implementing the training and education requirements under subdivisions 9 to 11 are developed, implemented, and annually reviewed and revised with meaningful input and active involvement of the hospital staff listed in paragraph (b), including the development of curricula and training materials.

(d) The violence interruption intervention director must ensure that the hospital's violence interruption intervention program is evaluated annually for effectiveness in providing timely access to crisis intervention services and reducing rates of workplace violence. The violence interruption intervention director must ensure that the program evaluation is conducted with meaningful input and active involvement of the hospital staff listed in paragraph (b).

Subd. 13. Enforcement. (a) Notwithstanding section 144.55, the commissioner of health shall inspect hospitals for compliance with this section according to the schedule in section 144.653, subdivision 2. The commissioner shall issue a correction order to the hospital if, upon inspection, the commissioner finds that the hospital was not in compliance with this section for three or more days. The correction order shall state the deficiency, cite the specific rule violated, and specify the time allowed for correction.

(b) If, upon reinspection, the commissioner finds that the hospital has not corrected deficiencies specified in the correction order, the commissioner shall issue a notice of noncompliance with a correction order stating all deficiencies not corrected and the provisions of section 144.653, subdivisions 6 to 9, apply.

Sec. 5. Minnesota Statutes 2023 Supplement, section 254B.05, subdivision 5, is amended to read:

Subd. 5. **Rate requirements.** (a) The commissioner shall establish rates for substance use disorder services and service enhancements funded under this chapter.

(b) Effective for services rendered on or after January 1, 2025, the commissioner shall increase rates for residential services subject to this section by ... percent. The commissioner shall adjust rates for such services annually according to the change from the midpoint of the previous rate year to the midpoint of the rate year for which the rate is being determined using the Centers for Medicare and Medicaid Services Medicare Economic Index as forecasted in the fourth quarter of the calendar year before the rate year. This paragraph does not apply to federally qualified health centers, rural health centers, Indian health services, certified community behavioral health clinics, cost-based rates, and rates that are negotiated with the county.

(c) For payments made under paragraph (b), if and to the extent that the commissioner identifies that the state has received federal financial participation for behavioral health services in excess of the amount allowed under Code of Federal Regulations, title 42, section 447.321, the state shall repay the excess amount to the Centers for Medicare and Medicaid Services with state money and maintain the full payment rate under paragraph (b).

(d) Effective for services rendered on or after January 1, 2025, the commissioner shall increase capitation payments made to managed care plans and county-based purchasing plans to reflect the rate increase for residential services provided in paragraph (b). Managed care and county-based purchasing plans must use the capitation rate increase provided under this paragraph to increase payment rates to behavioral health services providers. The commissioner must monitor the effect of this rate increase on enrollee access to services provided under paragraph (b). If for any contract year federal approval is not received for this paragraph, the commissioner must adjust the capitation rates paid to managed care plans and county-based purchasing plans for that contract year to reflect the removal of this provision. Contracts between managed care plans and county-based purchasing plans and providers to whom this paragraph applies must allow recovery of payments from those providers if capitation rates are adjusted in accordance with this paragraph. Payment recoveries must not exceed the amount equal to any increase in rates that results from this provision.

Sec. 6. Minnesota Statutes 2023 Supplement, section 256.969, subdivision 2b, is amended to read:

Subd. 2b. **Hospital payment rates.** (a) For discharges occurring on or after November 1, 2014, hospital inpatient services for hospitals located in Minnesota shall be paid according to the following:

- (1) critical access hospitals as defined by Medicare shall be paid using a cost-based methodology;
- (2) long-term hospitals as defined by Medicare shall be paid on a per diem methodology under subdivision 25;
- (3) rehabilitation hospitals or units of hospitals that are recognized as rehabilitation distinct parts as defined by Medicare shall be paid according to the methodology under subdivision 12; and
- (4) all other hospitals shall be paid on a diagnosis-related group (DRG) methodology.

(b) For the period beginning January 1, 2011, through October 31, 2014, rates shall not be rebased, except that a Minnesota long-term hospital shall be rebased effective January 1, 2011, based on its most recent Medicare cost report ending on or before September 1, 2008, with the provisions under subdivisions 9 and 23, based on the rates in effect on December 31, 2010. For rate setting periods after November 1, 2014, in which the base years are updated, a Minnesota long-term hospital's base year shall remain within the same period as other hospitals.

(c) Effective for discharges occurring on and after November 1, 2014, payment rates for hospital inpatient services provided by hospitals located in Minnesota or the local trade area, except for the hospitals paid under the methodologies described in paragraph (a), clauses (2) and (3), shall be rebased, incorporating cost and payment methodologies in a manner similar to Medicare. The base year or years for the rates effective November 1, 2014, shall be calendar year 2012. The rebasing under this paragraph shall be budget neutral, ensuring that the total aggregate payments under the rebased system are equal to the total aggregate payments that were made for the same number and types of services in the base year. Separate budget neutrality calculations shall be determined for

payments made to critical access hospitals and payments made to hospitals paid under the DRG system. Only the rate increases or decreases under subdivision 3a or 3c that applied to the hospitals being rebased during the entire base period shall be incorporated into the budget neutrality calculation.

(d) For discharges occurring on or after November 1, 2014, through the next rebasing that occurs, the rebased rates under paragraph (c) that apply to hospitals under paragraph (a), clause (4), shall include adjustments to the projected rates that result in no greater than a five percent increase or decrease from the base year payments for any hospital. Any adjustments to the rates made by the commissioner under this paragraph and paragraph (e) shall maintain budget neutrality as described in paragraph (c).

(e) For discharges occurring on or after November 1, 2014, the commissioner may make additional adjustments to the rebased rates, and when evaluating whether additional adjustments should be made, the commissioner shall consider the impact of the rates on the following:

(1) pediatric services;

(2) behavioral health services;

(3) trauma services as defined by the National Uniform Billing Committee;

(4) transplant services;

(5) obstetric services, newborn services, and behavioral health services provided by hospitals outside the seven-county metropolitan area;

(6) outlier admissions;

(7) low-volume providers; and

(8) services provided by small rural hospitals that are not critical access hospitals.

(f) Hospital payment rates established under paragraph (c) must incorporate the following:

(1) for hospitals paid under the DRG methodology, the base year payment rate per admission is standardized by the applicable Medicare wage index and adjusted by the hospital's disproportionate population adjustment;

(2) for critical access hospitals, payment rates for discharges between November 1, 2014, and June 30, 2015, shall be set to the same rate of payment that applied for discharges on October 31, 2014;

(3) the cost and charge data used to establish hospital payment rates must only reflect inpatient services covered by medical assistance; and

(4) in determining hospital payment rates for discharges occurring on or after the rate year beginning January 1, 2011, through December 31, 2012, the hospital payment rate per discharge shall be based on the cost-finding methods and allowable costs of the Medicare program in effect during the base year or years. In determining hospital payment rates for discharges in subsequent base years, the per discharge rates shall be based on the cost-finding methods and allowable costs of the Medicare program in effect during the base year or years.

(g) The commissioner shall validate the rates effective November 1, 2014, by applying the rates established under paragraph (c), and any adjustments made to the rates under paragraph (d) or (e), to hospital claims paid in calendar year 2013 to determine whether the total aggregate payments for the same number and types of services under the rebased rates are equal to the total aggregate payments made during calendar year 2013.

(h) Effective for discharges occurring on or after July 1, 2017, and every two years thereafter, payment rates under this section shall be rebased to reflect only those changes in hospital costs between the existing base year or years and the next base year or years. In any year that inpatient claims volume falls below the threshold required to ensure a statistically valid sample of claims, the commissioner may combine claims data from two consecutive years to serve as the base year. Years in which inpatient claims volume is reduced or altered due to a pandemic or other public health emergency shall not be used as a base year or part of a base year if the base year includes more than one year. Changes in costs between base years shall be measured using the lower of the hospital cost index defined in subdivision 1, paragraph (a), or the percentage change in the case mix adjusted cost per claim. The commissioner shall establish the base year for each rebasing period considering the most recent year or years for which filed Medicare cost reports are available, except that the base years for the rebasing effective July 1, 2023, are calendar years 2018 and 2019. The estimated change in the average payment per hospital discharge resulting from a scheduled rebasing must be calculated and made available to the legislature by January 15 of each year in which rebasing is scheduled to occur, and must include by hospital the differential in payment rates compared to the individual hospital's costs.

(i) Effective for discharges occurring on or after July 1, 2015, inpatient payment rates for critical access hospitals located in Minnesota or the local trade area shall be determined using a new cost-based methodology. The commissioner shall establish within the methodology tiers of payment designed to promote efficiency and cost-effectiveness. Payment rates for hospitals under this paragraph shall be set at a level that does not exceed the total cost for critical access hospitals as reflected in base year cost reports. Until the next rebasing that occurs, the new methodology shall result in no greater than a five percent decrease from the base year payments for any hospital, except a hospital that had payments that were greater than 100 percent of the hospital's costs in the base year shall have their rate set equal to 100 percent of costs in the base year. The rates paid for discharges on and after July 1, 2016, covered under this paragraph shall be increased by the inflation factor in subdivision 1, paragraph (a). The new cost-based rate shall be the final rate and shall not be settled to actual incurred costs. Hospitals shall be assigned a payment tier based on the following criteria:

(1) hospitals that had payments at or below 80 percent of their costs in the base year shall have a rate set that equals 85 percent of their base year costs;

(2) hospitals that had payments that were above 80 percent, up to and including 90 percent of their costs in the base year shall have a rate set that equals 95 percent of their base year costs; and

(3) hospitals that had payments that were above 90 percent of their costs in the base year shall have a rate set that equals 100 percent of their base year costs.

(j) The commissioner may refine the payment tiers and criteria for critical access hospitals to coincide with the next rebasing under paragraph (h). The factors used to develop the new methodology may include, but are not limited to:

(1) the ratio between the hospital's costs for treating medical assistance patients and the hospital's charges to the medical assistance program;

(2) the ratio between the hospital's costs for treating medical assistance patients and the hospital's payments received from the medical assistance program for the care of medical assistance patients;

(3) the ratio between the hospital's charges to the medical assistance program and the hospital's payments received from the medical assistance program for the care of medical assistance patients;

(4) the statewide average increases in the ratios identified in clauses (1), (2), and (3);

(5) the proportion of that hospital's costs that are administrative and trends in administrative costs; and

(6) geographic location.

(k) Effective for discharges occurring on or after January 1, 2024, the rates paid to hospitals described in paragraph (a), clauses (2) to (4), must include a rate factor specific to each hospital that qualifies for a medical education and research cost distribution under section 62J.692, subdivision 4, paragraph (a).

(l) Effective for services rendered on or after January 1, 2025, the commissioner shall increase payments for behavioral health services provided by hospitals paid on a diagnosis-related group methodology for hospital inpatient services by increasing the adjustment for behavioral health services under section 256.969, subdivision 2b, paragraph (e).

(m) Effective for services rendered on or after January 1, 2025, the commissioner shall increase capitation payments made to managed care plans and county-based purchasing plans to reflect the rate increase provided under paragraph (l). Managed care and county-based purchasing plans must use the capitation rate increase provided under this paragraph to increase payment rates to behavioral health services providers. The commissioner must monitor the effect of this rate increase on enrollee access to services described in paragraph (l). If for any contract year federal approval is not received for this paragraph, the commissioner must adjust the capitation rates paid to managed care plans and county-based purchasing plans for that contract year to reflect the removal of this provision. Contracts between managed care plans and county-based purchasing plans and providers to whom this paragraph applies must allow recovery of payments from those providers if capitation rates are adjusted in accordance with this paragraph. Payment recoveries must not exceed the amount equal to any increase in rates that results from this provision.

Sec. 7. Minnesota Statutes 2022, section 256B.0622, subdivision 2a, is amended to read:

Subd. 3a. **Provider certification and contract requirements for assertive community treatment.** (a) The assertive community treatment provider must:

- ~~(1) have a contract with the host county to provide assertive community treatment services; and~~
