Notes:

*The Governor recommends modifying MS 121A.201 to expand the allowable use of existing appropriations for COMPASS AND MnMTSS to include educational technology and artificial intelligence (AI).

**The Governor recommends changing the formula for literacy aid allocations, beginning in FY 2027, to no longer use Minnesota Comprehensive Assessment (MCA) proficiency data and growth rates as the basis for distribution and instead use an English learner concentration factor and a poverty concentration factor.

***The base for this appropriation in FY 2030 is \$0.

****The Governor recommends revising the distribution of student support personnel aid for the state to send aid directly to eligible cooperative units who serve students using the same total entitlement, resulting in a revenue neutral distribution change.
