

Subject Environmental Quality Board (EQB)

Authors Heintzeman

Analyst Janelle Taylor

Date February 28, 2025

Summary

This bill would repeal obsolete requirements of the Environmental Quality Board (EQB), including a requirement to coordinate and report on compliance with state and federal lead regulations originally due to the legislature in 1992, and environmental review requirements for certain silica sand projects applicable until final rules were adopted according to a 2013 law.
