

Written Testimony on HF4225 - Jennifer Hotovec
Submitted by email on 3/15/2022

Hello,
Attached is my written testimony and feedback for HF4225.

3.7
How shall the local law enforcement agencies inform local health community health board? This should be in writing and an auditable task that can be provided to the community upon request.

3.9
Why not make it REQUIRED that the local agency send Outreach to a camp facing eviction? By making it optional, the eviction further perpetuates being unhoused, causes harm and only displaces people to more instability.

Additional comments/observations:

-Assumes residents are not present when eviction occurs. It does not identify how the resident, if present, is provided with a claim form for their belongings that may be taken by the city/county.

-What is the criteria for determining what is not kept/removed as unsanitary or without value?

-If resident is not present when eviction occurs and their belongings are taken to storage, what is the process for resident to identify their belongings? How are stored belongings documented?

Thank you for the opportunity to provide feedback.

Jennifer Hotovec
