YOU'RE INVITED

Increasing Teacher Diversity in Minnesota

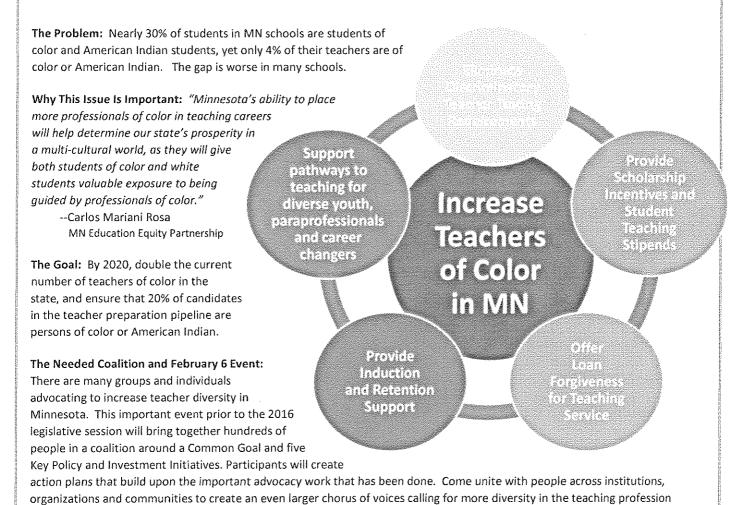

An Ongoing Community Conversation and Call to Action Saturday, February 6, 2016 9:30am-1:30pm

Minneapolis Community & Technical College (MCTC) 1501 Hennepin Avenue, Minneapolis 55403

Are you concerned about opportunity and achievement gaps in MN?

Are you concerned about the lack of teachers of color and American Indian teachers in Minnesota schools given the increasing diversity of PreK-12 students?

Join policy makers, community-based organization leaders, students, school administrators, teachers and teacher educators, philanthropists and others to make action plans for change!

To Register, go to https://mntoc2020.wordpress.com

needed to help close unacceptable opportunity and achievement gaps.

Questions? Increase.Teacher.Diversity.MN@gmail.com

MN Solar Economy Continues To Rise

The renewable energy sector has been one of the fastest growing sectors both in the US and worldwide. There are now 7.7 million jobs globally an increase of nearly 18% from the previous year, with nearly 1 million in the U.S. Solar has consistently outpaced other forms and there are now over 800,000 homes and businesses using solar in the U.S. alone and the top 25 corporate users have more than doubled their solar use since 2012. All this growth coupled with the recent federal extension of the Investment Tax Credit (ITC) means the demand for trained workers in the solar market will also increase.

- 2015 saw 3rd consecutive year of 20% employment growth.
- The U.S. solar industry is creating jobs at a rate 12 times higher than employment growth in the overall economy.
- With 119,931 solar workers, the installation sector remains the single largest solar employment sector growing by almost 24% since November 2014 and by 173% since 2010.
- Minnesota doubled the number of solar jobs from 2013 to 2014. And currently has over 2,000.
- 2,000+ projected jobs deficit if the Minnesota stays on pace with national average in the solar industry over next 5 years.
- Xcel Energy expecting to lose nearly 300 trained workers over next 4 years to retirements.
- Minority participation in the industry still needs improvement. African Americans represent only 5% of the workforce lowest among measured racial grouping.

Minnesota has only 2 training facilities ready to train the needed future workforce. Century College in White Bear Lake & JATC in St. Michael. The St. Michael location is already at capacity and looking at expansion options. Neither of these two locations is near minority populations or on a direct transit route through those communities.

Minnesota needs to increase the investments in training for the renewable energy and specifically solar if we want to be part of this growing sector. Locating training centers in urban areas along high traffic and transit routes will allow for greater participation and help solve an energy industry need while also providing high paying jobs to minorities.

Model Cities Redevelopment, St. Paul, MN

A Model Cities project

Model Cities is carrying out a new development initiative along University Avenue in St. Paul in connection with the new Light Rail Transit (LRT) line, known as the Green Line. The initiative will consist of the construction of two new development projects that include commercial and retail uses, quality housing that is affordable, public art and green space close to the Victoria Street LRT Station. The project will help revitalize a stretch of University that has experienced substantial disinvestment over the last several decades.

The first site is Model Cities' BROWNstone building, located directly on the northeast corner of Victoria and University at the LRT station. This building has housed Model Cities' offices and provided retail space for local businesses. The configuration of the building will not allow opportunities for increased commercial and transit-oriented uses at a very active Light Rail stop. In addition, the building's age is making it increasingly cost-prohibitive to repair.

Proposed rendering for BROWNstone

Model Cities will remove the current building on the site and construct a new multi-story development that will include close to 9,000 ft² of ground floor commercial space for small and minority-owned businesses. The top three floors will feature 35 units of housing affordable to low and moderate income households, while the second floor will include Model Cities' main offices. Additionally, Model Cities will convert a parking lot located next to the building into an approximately 7,000 ft² pocket park. A community room will provide space for local groups and organizations to have meetings and events. Public art that celebrates the railroad history

of the neighborhood, with a particular focus on African American railroad workers such as the Pullman Porters, Dining Car Waiters and Sleeping Car Porters, will be included as well. A Reading Room that highlights this history will be a major feature of the new building.

The second site, called Central Exchange, is located one block to the east down University Avenue. This development, which will bring currently vacant land back into productive use, is projected to provide approximately 35 units of housing on the upper floors, and more than 7,200 square feet of first floor commercial space. Like BROWNstone, it will include a pocket park along University. Green roofs will also present an opportunity to carry out sustainable stormwater management on the site.

Proposed rendering for Central Exchange

In total, Model Cities Redevelopment, as the overall initiative will be known, is projected to provide an estimated 70 units of stable, affordable housing to both new and existing members of the community. The project is expected to produce over 27,000 ft² of commercial, retail and community space, and it is estimated to provide in excess of 50 new and retained jobs in the community after project completion.

The project will provide a number of benefits to the community. While it will enhance the local tax base, it will also contribute to the economic revitalization of the area and result in new opportunities for businesses, stable jobs, and safe housing. In addition, it will provide a model for environmentally friendly, mixed-use development at transit stations and on infill sites along the Green Line for many years to come.

Community Ambassadors

Overview

In response to spikes in youth crime rates and concerns over throngs of youth gathering to 'hang out' —volatile settings known to escalate quickly into violence—the Saint Paul Mayor's Office and Police Department (SPPD) launched a powerful intervention initiative that literally 'met the youth where they were at' — on the streets! In June 2013, Community Ambassadors (i.e., youth workers hired specifically to provide street outreach services) were placed in targeted downtown St. Paul locations evenings and on weekends to engage and connect with the youth. In just three months, the Ambassadors connected and interacted with 236 young people—working to build relationships with the youth, collecting demographic information; learning about the barriers that could lead them to problem behaviors. Hiring experienced, culturally-specific outreach workers—many of whom were from the community and known by the youth—enabled the Ambassadors to successfully verbally deescalate situations that might otherwise have spiraled into violence. Youth arrests in the targeted areas dropped an average of 40%!

These impressive results led to the creation of the St. Paul Youth Intervention Initiative (SPYII) in June 2014. A year-round, city-wide model, SPYII blended street outreach and engagement services with skill-building programming and services (e.g., employment, life skills, education support, tattoo removal and more) delivered by partnering community organizations. Service impact is measured via data related to juvenile arrests and incidents of youth-led violence provided by the SPPD and information provided by community representatives (e.g., civic leaders, faith community, business).

Building on Success

SPYII uses intervention strategies guided by best practices to decrease involvement in the criminal justice system and provides meaningful supports to traditionally hard-to-reach youth. Despite being in operation for less than two years, SPYII has earned the respect of community stakeholders for quality services and impressive results:

Services to Hard-to-Reach Youth.

- The lives of 3,500+ youth were touched by this promising initiative in its first 17 months of operation.
 Between June 2014 and March 2015 alone, the Ambassadors engaged and/or referred 1,940 at-risk youth to community partners for programming and services.
- 30 youth acquired new skills, confidence and positive community connections via summer employment (2015) provided through Right Track, a program of the City of Saint Paul. Three of the youth were hired by their employer at the conclusion of the summer program.

Supporting Safe, Healthy Communities.

- Juvenile Arrests decrease by 63% when the Ambassadors were working in targeted areas throughout the City of Saint Paul.
- The Ambassadors have played a key role working with youth present at multiple events across Saint Paul including St. Paul Police Safe Summer Nights, Rondo Days, and Cinco de Mayo.

Aligning Services to Meet Community Need.

- Revenue for SPYII has grown from \$50,000 (2013) to \$440,000 (2015).
- Youthprise, fiscal sponsor for SPYII, has been a partner since 2014. Youthprise has agreed to continue for a third year with leveraging dollars starting in 2016.
- The number of Ambassadors has grown from 18 (2013) to more than 30; over 90% of the original Ambassadors remain with the Initiative.
