

Here is my written testimony.

I just heard about the redistricting proposal which I would have expect my local representative to inform their constituents about the change.

But, the notice came from a different source.

How this helps the residents of my district is beyond me. Most likely it does not. It gives the appearance that the DFL is only trying to ensure power especially how disastrous we are being governed right now.

The city has different issues then the suburbs and based on that we should leave the districts as is.

I would like to know what the reasoning is for redistricting besides the appearances to give a party the ability to remain in power.

As we see from the federal government we see a top down approach which ignores the less populated areas.

Our district should just be included with suburban and rural areas and our representatives would better able to address our interests and concerns.

the redistricting would not do that.

End of written testimony

Nancy,

Thanks so much!
