

Subject Notification of Wastewater Pollutant Discharges

Authors Fischer

Analyst Janelle Taylor

Date March 16, 2026

Summary

This bill would amend a law passed in 2023 that added notification requirements when there is a pollutant discharge from a publicly owned water treatment facility or a publicly or privately owned domestic sewer system. This bill would add downstream Tribal governments to the list of those required to be promptly notified. The addition is recommended by the Pollution Control Agency.
