INTERNSHIP PROGRAM™

2020 Annual Report & Insights

SciTech

INTERNSHIP PROGRAM™

STATEWIDE IMPACT:
Building and retaining Minnesota's STEM workforce since 2012 with nearly 2,000 interns placed in 138 cities.

What is SciTech?

The SciTech Internship Program is the State of Minnesota's only STEM workforce development program.

SciTech connects college students pursuing STEM degrees with paid internships in small, for-profit Minnesota companies.

Qualified companies receive a wage match that covers 50 percent of the intern's wages. The match is capped at \$2,500.

SciTech internships provide students with high quality opportunities to apply their classroom knowledge and solve real business challenges. Each position provides top-notch experience for the student while also helping small businesses increase their productivity and build their future talent pipeline.

Students:

Must be a current college student; at least 18; a Minnesota resident or attend school in state; 2.5 or greater GPA; half way through a STEM degree; eligible to work in the U.S.

Companies:

Must be a small, for-profit company with a physical presence in Minnesota; fewer than 250 employees worldwide; in a qualifying industry (see the full list on page 9); and offer a STEM internship.

COVER STORY: When **Alaina Johnson's** summer internship with a larger company was canceled due to Covid-19, she turned to SciTech. Here she found a new opportunity at **MIVI Neuroscience, Inc.**, a small, medical device lab working to improve stroke patient outcomes. Learn more about Alaina on page 10.

"We've found that the interns we bring in have natural curiosity, and it is worth its weight in gold to have them with us. Mohamed [Noor] was persistent, and everybody who met him when he came to interview said 'yeah, we need to get that guy in.' **Everybody is massively winning with SciTech.** Mohamed is getting experience as an Engineering Manager, and we are getting a talented worker." *Chris Benyo, CEO, Lift and Store, Ramsey*

Dear Reader,

As we wrap up what has been arguably the most unusual year in our lifetime, one truth remains constant: The need for people who can solve complex problems, drive innovation and advance technology is more important than ever.

A strong STEM workforce provides our communities with critical thinkers and problem solvers. Companies in STEM industries brought us technology like broadband, WiFi and software applications that helped us stay connected when physical distancing became the norm. STEM professionals in manufacturing re-purposed equipment practically overnight to respond to the demand for the products needed to fight the pandemic and support front line workers. And it is STEM workers in medicine that are developing the much anticipated vaccines that will save lives and allow us to move forward and find our new normal.

The SciTech Internship Program connects college STEM majors - our state's future problem solvers - with valuable hands-on learning opportunities in small Minnesota companies. Funding provided by the Minnesota legislature provides a fifty percent wage match worth up to \$2,500 that helps companies boost their productivity and invest in their talent pipeline.

The need to reinvest in the SciTech Internship Program is greater than ever, especially as neighboring states are supporting similar programs with far more resources (see page 7). SciTech has a proven track record in building and retaining Minnesota's STEM workforce, with more than eighty percent of interns staying here after graduation to begin their professional careers. Minnesota's mighty and resilient small business sector will continue to need help connecting to and competing for STEM talent, which SciTech helps them do.

We encourage you to take a few minutes to explore this report to see for yourself the important impact and return on investment the SciTech Internship Program has had for Minnesota. We thank the legislature in advance for its continued support of this valuable state resource.

Best,

Jeff Tollefson
President & CEO

Becky Siekmeier
SciTech Program Director

Minnesota Technology Association

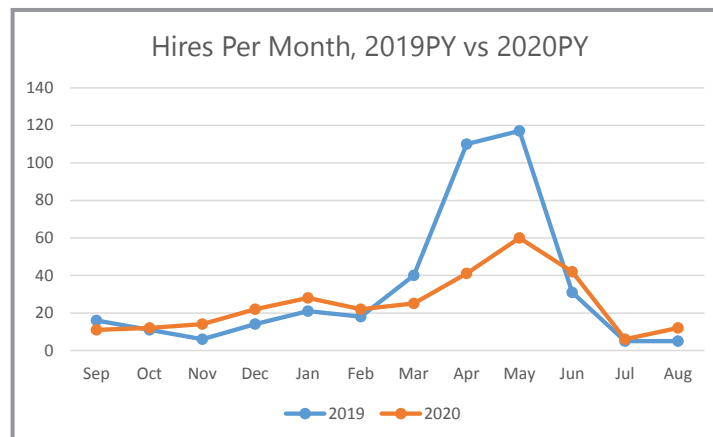

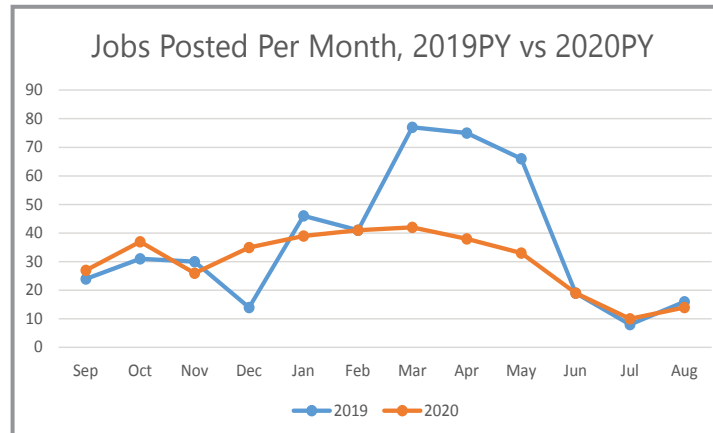

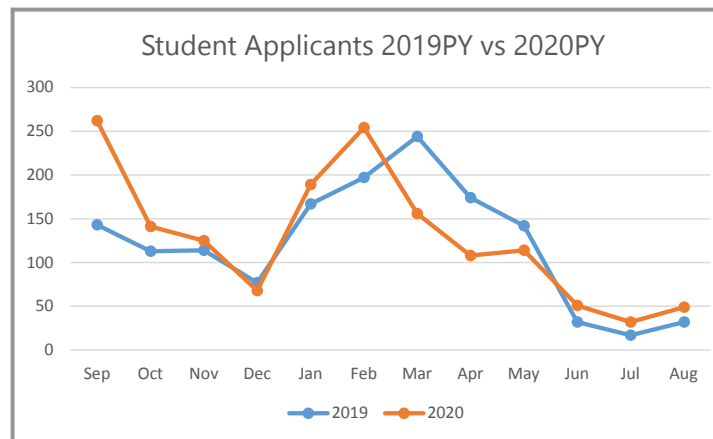

MAKING LEMONADE: THE IMPACT OF COVID-19

Nothing in Minnesota was left untouched when the Covid-19 pandemic hit in the spring of 2020, and SciTech was no exception. The program was impacted in several ways:

- After out-pacing the 2019 rate of new student applicants between September 2019-February 2020, applications dropped between March and May before picking up again in the summer.
- The number of new jobs posted from March-May 2020 also saw a significant drop compared to the same months in 2019. Fifteen active jobs were canceled due to Covid-19 during this period.
- The number of hires dropped considerably from March-May 2020 compared to the same months in 2019. Thirty hires that had been confirmed for a summer start date were canceled due to Covid-19.
- Between March and May, Covid-19 had a more adverse impact on the rate of hires for women vs men and students of color vs white students.
- Many of the internships that went forward took place remotely, which presented novel onboarding challenges in some cases.

But SciTech made lemonade out of lemons:

- The fact the so many companies were willing to host remote internships made it possible for more students to be hired than if the internship had to take place in person, and allowed students to work for companies anywhere in Minnesota without relocating.
- Because all travel and other expenditures such as marketing and in-person student outreach came to a halt in March, SciTech was able to reallocate funding toward wage matches, which resulted in the ability to fund more positions than expected.
- All site visits took place virtually, providing the ability to conduct nearly 100 Zoom calls with participants throughout the summer, resulting in roughly 20 more check-ins than a normal year.

SciTech Internship Program • MnTech

Daniel's Story

Posted on LinkedIn in June 2020

"Over the past 8 months, I had applied to 400+ internships, interviewed for 11 positions, and had 5 positions canceled due to Covid-19, but that didn't stop me from continuing my search...I found this opportunity at TLC Millimeter Wave Products through the SciTech Internship Program. If you're a Minnesota College/University student, I highly recommend checking out this program."

– Daniel Glynn, Barnesville, Mechanical Engineering, UMN

FUN FACT

Two months after this post, Daniel and the other SciTech interns at TLC Millimeter Wave Products were **listed as inventors on a patent for a Rapid Covid-19 Detector.**

A WIN FOR STUDENTS, EMPLOYERS & MINNESOTA

VALUE ADDED SERVICES FOR PARTICIPANTS

In addition to attending dozens of career fairs each year, SciTech's student outreach also included presentations about internship opportunities through SciTech to more than 25 student groups. The program also partners with the North Star STEM Alliance to engage women and students of color in QuikSkills job search training workshops to help them gain the confidence and skills they need to succeed.

SciTech is so much more than a great place to find interns. It's also a great resource for best practices on recruiting and onboarding.

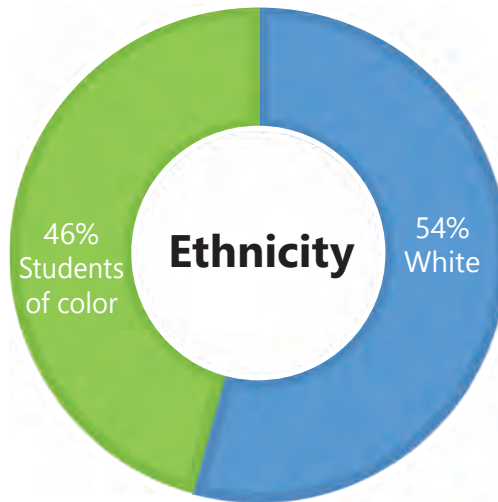

HOW DOES MN'S INVESTMENT COMPARE?

Our neighbors are investing in their future workers in high demand, high skill, high wage jobs, too. But, Iowa spends more than twice as much on internship programs as Minnesota, and Nebraska is investing nearly double what Minnesota does. Iowa, Nebraska and North Dakota all provide a higher wage match to employers in their internship programs than Minnesota. **In per capita spending, Minnesota's investment ranks a distant last. Clearly, our neighboring midwest states see the importance of building and retaining their skilled workforce and are making significant investments in both employers and students to accomplish their goals. It's never been more important for Minnesota to invest in its future, too.**

STATE/PROGRAM	FUNDING	FUNDING PER CAPITA	REIMBURSEMENT	PROGRAM FOCUS	SERVICES	ELIGIBILITY (COMPANY/STUDENTS)

SUMMARY OF STUDENT APPLICANTS

Top Schools by Applicants:

UMN-Twin Cities (585), St. Cloud State (165), University of St. Thomas (74), UMN-Duluth (60), MN State University Mankato (52), Metro State (48), Macalester (42), NDSU (34)

1,549

STUDENT APPLICANTS

This is an increase of 49 students over 2019 - **an amazing result** given the impact of the pandemic in the spring!

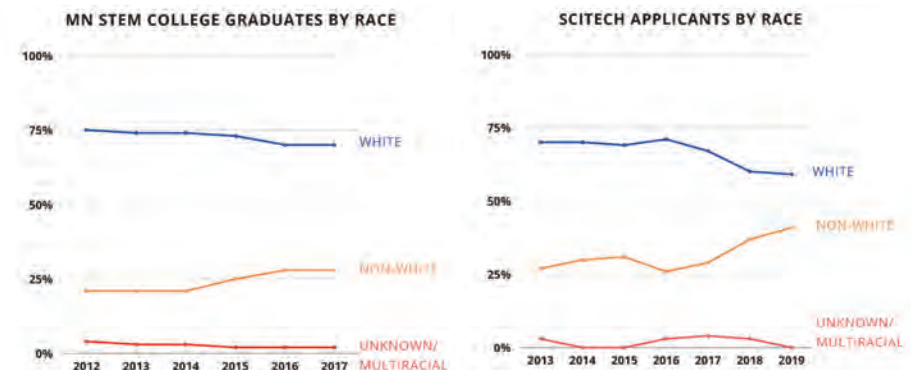

61%

were students underrepresented in STEM in 2020
of APPLICANTS (women and students of color)

How does the SciTech applicant pool compare to Minnesota's pipeline?

Overall, the number of STEM students of color graduating from Minnesota's college pipeline has slightly increased year-over-year since 2012.

When compared to Minnesota college graduates by race, SciTech's applicant pool is consistently more racially diverse.

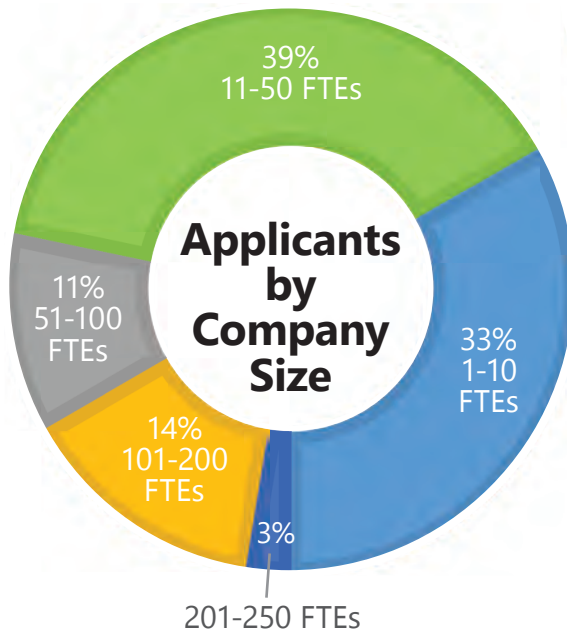

SUMMARY OF EMPLOYER APPLICANTS

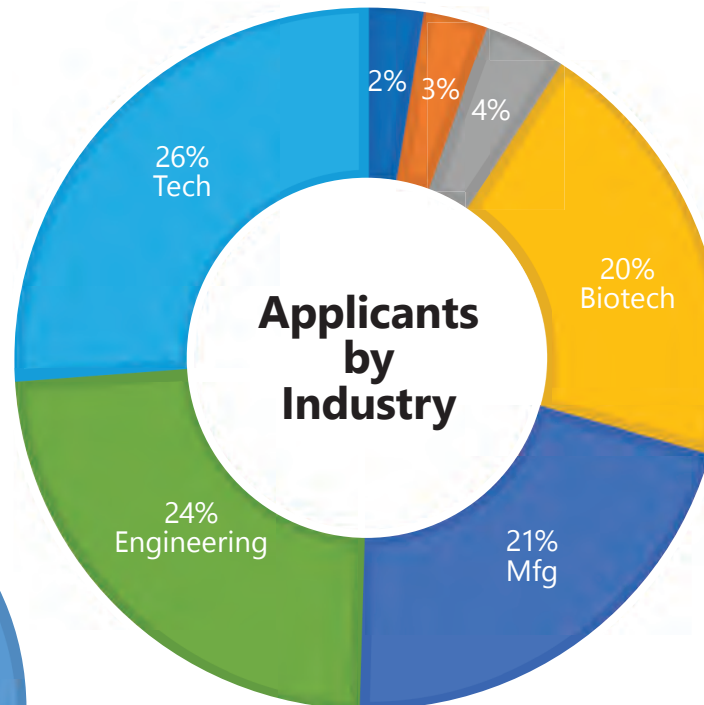

72%

of small business applicants had
**50 or fewer
employees worldwide**
Median: 25 Fulltime Equivalents (FTEs)

238 COMPANY APPLICANTS

This is down 81 from 2019, mostly due to Covid-19

Applicants by Industry

- 3%: Aerospace and Defense
- 4%: Agriculture, Food and Forestry
- 20%: Biotechnology and Life Sciences
- 21%: Mining, Materials, Mfg and Processing
- 24%: Engineering Services
- 26%: IT/Computer Technology

"SciTech has provided us with some exceptional interns like Khalique [Rogers, left]. He has a wonderful skill set and has added a lot to our team. I really admire his work ethic and facilitation skills and was excited to offer him a position after the internship ended."

Jeff Aguy (center), NCXT, Minneapolis

COVER: ALAINA JOHNSON & MIVI NEUROSCIENCE

to Matt Ogle, Chief Technical Officer and Founder, about half of the students they hire stay on fulltime after they graduate.

When MIVI posted their internship position with SciTech this spring, they received several highly qualified applicants. One of the things that made Alaina Johnson stand out, a mechanical engineering major at Baylor University, was her previous internship experience and her background in CAD.

help people, specifically by working to improve stroke patient outcomes.

During her MIVI internship, Johnson had lots of opportunities to do so. Her biggest project involved writing the protocol for design verification testing and then leading a design review meeting around it. This was a unique opportunity for an intern, granting her a one-on-one audience with MIVI's founder and head engineers.

"I really like working at MIVI because of the impact I'm making in the company," Johnson said. "When you're at a small company like MIVI, you have the opportunity to experience every aspect of the company. This internship confirmed my passion for the medical device industry."

"Alaina has been one of the most productive interns we've had," said Lise Lachance, MIVI's Director of R&D. "She was able to perform a lot of tasks without any hand holding."

About MIVI Neuroscience:

MIVI Neuroscience develops and commercializes innovative clinical solutions for neurointerventional procedures such as Ischemic Stroke. In layman's terms, they develop catheters to remove artery obstructions. As a small lab and a startup, MIVI has utilized interns to help develop their product since 2015. According

Meet the Intern:

When Johnson's summer internship with a larger company was canceled due to Covid-19, she turned to the SciTech job board where she found a new opportunity interning at MIVI. Johnson had wanted to work in the medical device industry for a while and was looking forward to a position where she could directly

SciTech is an invaluable partner to small or mid-sized employers who may otherwise have difficulty hiring interns due to budget and resource constraints. They make it very easy for employers to find and hire exceptional interns and play a key role in preparing and retaining talented students in MN.

Lisa Schoening, Director, HR, Safety & Marketing, Aroplax Corp., Monticello

“

I got 20 or so applicants in just a couple of days. There were so many great candidates that I couldn't say no and hired two interns, even though I only needed one.

Siba Das, CEO, NovoClade, St. Paul

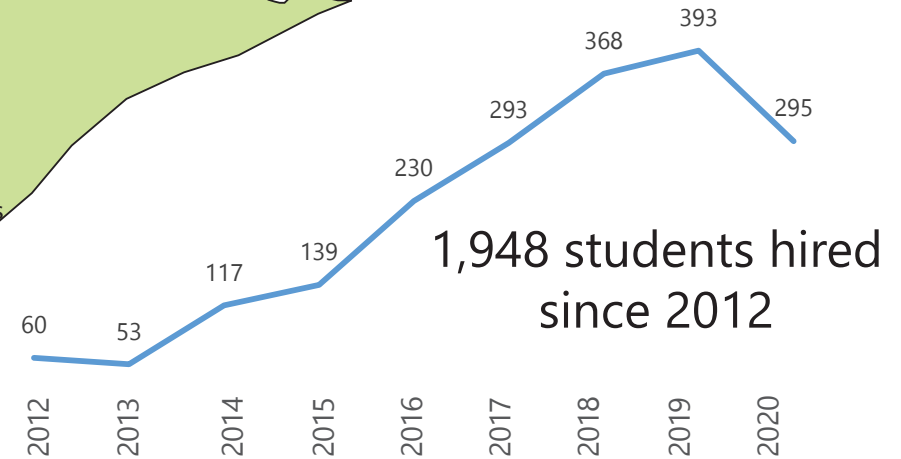

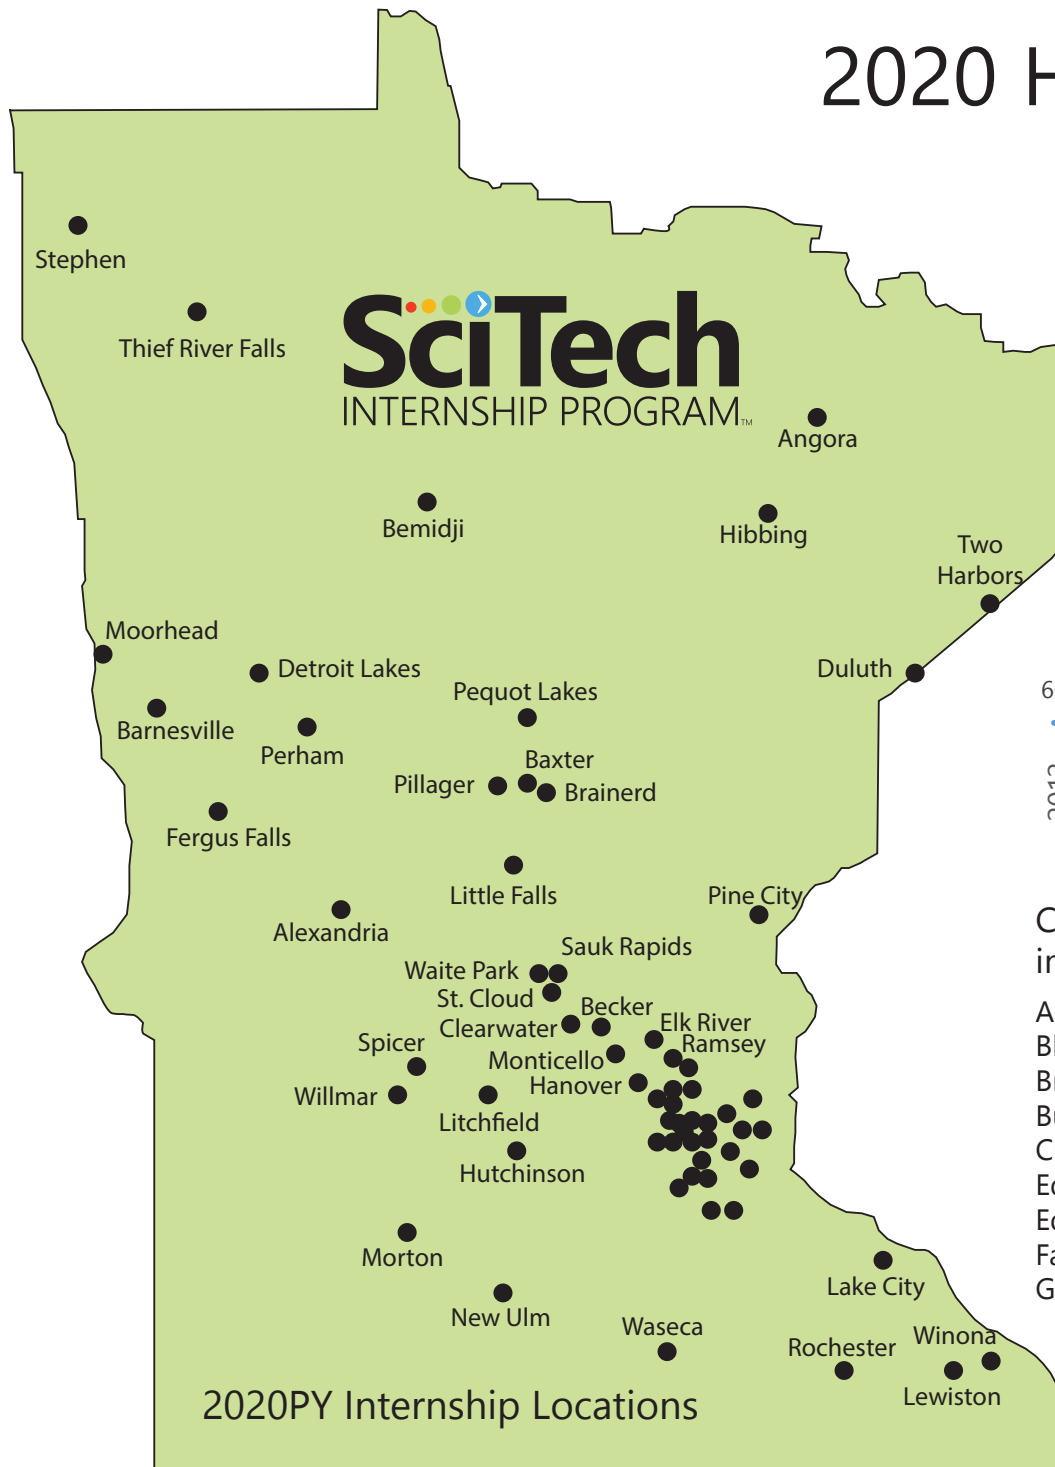

FUN FACT: NovoClade was a National Science Foundation SBIR recipient, a 2019 Tekne-SBIR Award recipient and a MN CUP finalist for their innovative research.

Abby Kaluza • 1st

Former Lab Intern at August Schell Brewing Company
3d • 🌐

Today I wrapped up an 11 week internship with the August Schell Brewing Company. I am one of the lucky ones who was able to go into work each and everyday, almost as if there was some normalcy. Schell's did a fantastic job of adapting to our ever changing situation and continually made improvements and implemented measures to increase safety and security. I came in knowing so little and have left with so much respect for those who work in laboratories and the brewing industry. This was such an amazing experience and I am going to miss it! Again, thank you **SciTech Internship Program** for helping me find this incredible opportunity!

👍 🌐 10 • 2 Comments

Ever since we've been using the SciTech program for summer internships, there have been so many more people that have contacted us. One of the best things for our continued improvement is to have interns every summer. It definitely helps to have fresh eyes.

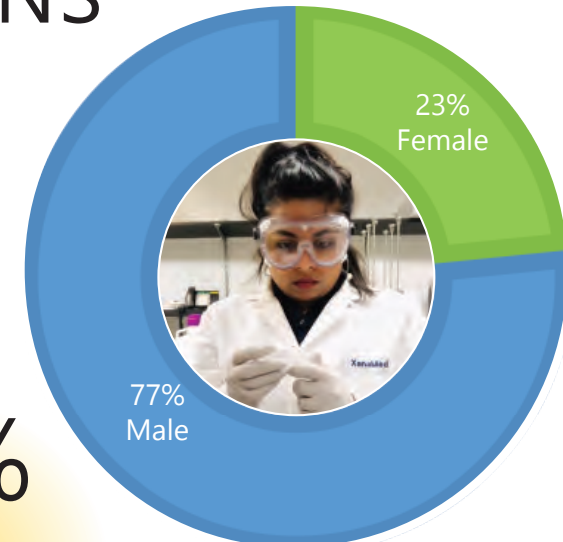

Sean Monroe, Lab Manager at August Schell Brewing Company, New Ulm

This is our third year with SciTech and it's been monumental. We've had great success recruiting talent. It's sparsely populated out where we are so talent is harder to find. Having the cost partially covered, we can showcase what we can do here.

Melissa Benda, HR Generalist at Houston Engineering, Thief River Falls

Samuel Hohenshell • 2nd
Software Engineer at Third Wave Systems
2d • 🌐

Today was the last day of my internship at Third Wave Systems! Felt supported, respected, and appreciated by the wonderful team there. Only problem was the grueling commute from my bed to my desk on the other side of the room. Thank you **Third Wave Systems** and **SciTech Internship Program** for the fantastic opportunity :)

FEEDBACK FROM STUDENTS & EMPLOYERS

"SciTech got my foot in the door, what else needs to be said? I received only one interview for an internship despite all of the resumes I sent out and I found that through SciTech. **Because of the added incentive SciTech was able to offer, the company I'm at gave me a chance, and now they've asked me to return.**" *Jonathan Skarda, F3 Wireless*

"Hiring interns has always enabled us to "do more with less" and gives companies an opportunity to provide important career development/training to the next generation of workers. **It's a win-win.**"

Ross Higgins, COO, Phenomix Sciences

"The SciTech program made it easy to find many different science related internships in a specific area. The way the website is organized gives a lot of information about each internship and they provide a direct contact to the company. This allowed me to reach out directly to get a conversation started."

Cassidy Geddes, TLC Millimeter Wave Products

"We are a very small company. We like to help students get experience in our field, but have a limited budget. **The SciTech Internship Program has been very helpful to provide us with an intern and provide the intern with a great experience.**"

Carolyn Dindorf, Fortin Consulting

"I am an intern at HealthFactors because of Scitech and I am really thankful for it. Working here has really helped me to understand the roots of an organization to become a successful company which eventually will help me to come out as a potential leader from this internship." *Bikash Timalsina, Health Factors*

"SciTech provides us with such an incredible pool of intern candidates who are motivated and excited about working for a small organization where their internship will have real impact." *Spencer Grimes, mobileAxept*

Isthmus Engineering has enabled valuable professional and technical skill development in my field while also providing opportunities to broaden my experience outside of it. **The community atmosphere of employees and fellow SciTech interns has been positive and motivating, which enabled the experience to be valuable despite Covid-19.**

Andrea Johnson, Engineering Intern, Isthmus Engineering, St. Paul

“

As a small business, we wouldn't have really known where or how to find quality STEM interns to help us with development... **SciTech already knew where they were and we were really impressed by the quality of applicants and with the three interns that we ended up bringing on board.**

Mike Norton, President and COO, Railbox Consulting, Minneapolis

”

HIRING COMPANIES

“**SciTech** makes our internship program possible through wage matching, and **allows us to reach a wider and more diverse pool of talented up-and-coming developers who can be valuable additions to our team.** It’s important to our company to be able to host interns each year and ideally hire them or connect them to other long-term career opportunities, so **we are happy to partner with SciTech to make that possible.**”
