

Clay County Transfer Station and Resource Recovery Campus

The City of Moorhead supports Minnesota Pollution Control Agency's request to fund the Clay County Transfer Station and Resource Recovery Campus.

- Processes solid waste for Clay County and will accept and safely process hazardous and problem waste materials from Clay County and western Minnesota
- Waste collected hauled to regional Perham Resource Recovery Facility for final processing
- Enables increased recycling and diverts more solid waste from landfills

SAFE, EFFICIENT & COST EFFECTIVE

- ✓ Separate tipping floors and roads for general public and professional drivers
- ✓ Larger tipping floor allows removal of unsafe materials prior to transporting to the regional Perham Resource Recovery Facility for processing
- ✓ Allows removal of bulky items which are not suitable for processing to be removed prior to transporting to Perham, thereby increasing transportation efficiencies and cost savings
- ✓ Loading procedures compatible with the loadout system in place in Perham

SHOVEL READY

- ✓ Site is secured, layout designed and construction drawings are complete; Construction will begin upon receiving matching state funding
- ✓ Permit application approved by MPCA
- ✓ Preliminary capital costs determined
- ✓ Project anticipated to be part of the 2019 MPCA Capital Assistance Bond Request

Clay County Transfer Station & Problem Materials Facility
