(b) The commissioner may not prioritize projects based on criteria other than the criteria established under paragraph (a). Nothing in this section precludes the Department of Natural

132.1 Resources from following chapter 16B requirements or considering the ability of the grantees
132.2 to complete the work of the grant.

132.3 **Sec. 4. [86B.109] ABANDONED WATERCRAFT.**

132.4 **Subdivision 1. Tagging authority; notice to owner.** (a) A peace officer or an employee

132.16 by certified mail, return receipt requested, to the registered owner of the watercraft. The
132.17 notice must state that:

132.20 (2) failure to remedy within 14 days of the notice being sent is a criminal violation that
132.21 may result in civil and criminal penalties and forfeiture of the watercraft.

132.22 **Subd. 2. Failure to remedy.** The registered owner of a watercraft who knowingly fails
132.23 to remedy the condition that resulted in the watercraft being tagged within 14 days of the
132.24 commissioner sending the notice required by subdivision 1, paragraph (c), is guilty of a
132.25 misdemeanor. In addition, the owner is liable to the Department of Natural Resources for
132.26 all costs incurred by the commissioner in enforcing this section against the owner.

132.27 **Subd. 3. Seizure of abandoned watercraft.** Fourteen days after the commissioner sends
132.28 the notice required by subdivision 1, paragraph (c), to the registered owner or concludes
132.29 that there is no registered owner, the commissioner must investigate the watercraft. If, upon
132.30 inspection, the watercraft has not been removed and the condition that prompted the peace
132.31 officer or employee to tag it has not been substantially remedied, the watercraft is considered

133.1 abandoned and the commissioner must seize and forfeit the watercraft according to section

133.5 Subd. 5. **Exceptions.** This section does not apply to previously sunk watercraft that are
133.6 of historical significance or currently a destination for scuba divers or commercial tourism
133.7 and that do not pose an ongoing environmental or public safety risk.

ARTICLE 6

ENVIRONMENTAL PERMITTING REFORM

Section 1. Minnesota Statutes 2024, section 116.03, subdivision 2b, is amended to read:

Subd. 2b. **Permitting efficiency.** (a) It is the goal of the state that environmental and resource management permits be issued or denied within 90 days for tier 1 permits or 150 days for tier 2 permits following submission of a permit application. The commissioner of the Pollution Control Agency ~~shall~~ must establish management systems designed to achieve the goal. For the purposes of this section, "tier 1 permits" are permits that do not require individualized actions or public comment periods, and "tier 2 permits" are permits that require individualized actions or public comment periods. Goals established in this paragraph do not apply to permit applications required due to agency enforcement actions.

(b) The commissioner ~~shall~~ must prepare an annual permitting efficiency report that includes statistics on meeting the tier 2 goal in paragraph (a) and the criteria for tier 2 by permit categories. The report ~~is due August 1~~ must be submitted to the governor and to the chairs and ranking minority members of the house of representatives and senate committees having jurisdiction over environment policy and finance by October 1 each year and must be posted on the agency's website. The report must include:

(1) for each permit applications application that have has not met the goal, the report must state the reasons for not meeting the goal. In stating the reasons for not meeting the goal, the commissioner shall separately identify delays an explanation of whether the delay was caused by the responsiveness of the proposer, lack of staff, scientific or technical disagreements, or the level of public engagement. The report must specify;

(2) for each permit that has not met the goal, the number of days from initial submission of the application to the day of determination that the application is complete. The report must aggregate;

(3) a summary of the data for the year reporting period and assess an assessment of whether program or system changes are necessary to achieve the tier 2 goal. The report must be posted on the agency's website and submitted to the governor and the chairs and ranking minority members of the house of representatives and senate committees having jurisdiction over environment policy and finance. in paragraph (a);

(4) a statement of the number of tier 2 permits completed within the reporting period and, immediately following in parentheses, a statement of the percentage of total applications received for that tier 2 permit category that the number represents, stated separately for industrial and municipal permits; and

157.1 (5) for permits that did not meet the goal due to lack of staff, a combined estimate of
157.2 the aggregate staff resources that would have been necessary for all affected permits to meet
157.3 the goal.

157.4 (c) The commissioner ~~shall~~ must allow electronic submission of environmental review
157.5 and permit documents to the agency.

157.6 (d) Within 30 business days of application for a permit subject to paragraph (a), the
157.7 commissioner of the Pollution Control Agency ~~shall~~ must notify the permit applicant, in
157.8 writing, ~~whether the application is complete or incomplete. If the commissioner determines~~
157.9 ~~that an application is incomplete, the notice to the applicant must enumerate~~ of all
157.10 deficiencies, while citing specific provisions of the applicable rules and statutes, and must
157.11 advise the applicant on how the deficiencies can be remedied. The applicant has five business
157.12 days to remedy all identified deficiencies before the commissioner determines that the
157.13 application is complete or incomplete. If the commissioner determines that the application
157.14 is complete, the ~~notice~~ commissioner must confirm the application's tier 1 or tier 2 permit
157.15 status. If the commissioner believes that a complete application for a tier 2 construction
157.16 permit cannot be issued within the 150-day goal, the commissioner must provide notice to
157.17 the applicant with the commissioner's notice that the application is complete and, upon
157.18 request of the applicant, provide the permit applicant with a schedule estimating when the
157.19 agency will begin drafting the permit and issue the public notice of the draft permit. This
157.20 paragraph does not apply to an application for a permit that is subject to a grant or loan
157.21 agreement under chapter 446A.

157.22 (e) For purposes of this subdivision, "permit professional" means an individual not
157.23 employed by the Pollution Control Agency who:

157.24 (1) has a professional license issued by the state of Minnesota in the subject area of the
157.25 permit;

157.26 (2) has at least ten years of experience in the subject area of the permit; and

157.27 (3) abides by the duty of candor applicable to employees of the Pollution Control Agency
157.28 under agency rules and complies with all applicable requirements under chapter 326.

157.29 (f) Upon the agency's request, an applicant relying on a permit professional must
157.30 participate in a meeting with the agency before submitting an application:

157.31 (1) at least two weeks prior to the preapplication meeting, the applicant must submit at
157.32 least the following:

- 158.1 (i) project description, including, but not limited to, scope of work, primary emissions
158.2 points, discharge outfalls, and water intake points;
- 158.3 (ii) location of the project, including county, municipality, and location on the site;
- 158.4 (iii) business schedule for project completion; and
- 158.5 (iv) other information requested by the agency at least four weeks prior to the scheduled
158.6 meeting; and
- 158.7 (2) during the preapplication meeting, the agency ~~shall~~ must provide for the applicant
158.8 at least the following:
- 158.9 (i) an overview of the permit review program;
- 158.10 (ii) a determination of which specific application or applications will be necessary to
158.11 complete the project;
- 158.12 (iii) a statement notifying the applicant if the specific permit being sought requires a
158.13 mandatory public hearing or comment period;
- 158.14 (iv) a review of the timetable established in the permit review program for the specific
158.15 permit being sought; and
- 158.16 (v) a determination of what information must be included in the application, including
158.17 a description of any required modeling or testing.
- 158.18 (g) The applicant may select a permit professional to undertake the preparation of the
158.19 permit application and draft permit.
- 158.20 (h) If a preapplication meeting was held, the agency ~~shall~~ must, within seven business
158.21 days of receipt of an application, notify the applicant and submitting permit professional
158.22 that the application is complete or is denied, specifying the deficiencies of the application.
- 158.23 (i) Upon receipt of notice that the application is complete, the permit professional ~~shall~~
158.24 must submit to the agency a timetable for submitting a draft permit. The permit professional
158.25 ~~shall~~ must submit a draft permit on or before the date provided in the timetable. Within 60
158.26 days after the close of the public comment period, the commissioner ~~shall~~ must notify the
158.27 applicant whether the permit can be issued.
- 158.28 (j) Nothing in this section shall be construed to modify:
- 158.29 (1) any requirement of law that is necessary to retain federal delegation to or assumption
158.30 by the state; or
- 158.31 (2) the authority to implement a federal law or program.

159.1 (k) The permit application and draft permit ~~shall~~ must identify or include as an appendix
159.2 all studies and other sources of information used to substantiate the analysis contained in
159.3 the permit application and draft permit. The commissioner ~~shall~~ must request additional
159.4 studies, if needed, and the permit applicant ~~shall~~ must submit all additional studies and
159.5 information necessary for the commissioner to perform the commissioner's responsibility
159.6 to review, modify, and determine the completeness of the application and approve the draft
159.7 permit.

159.8 Sec. 2. Minnesota Statutes 2024, section 116.07, subdivision 4d, is amended to read:

159.9 Subd. 4d. **Permit fees.** (a) The agency may collect permit fees in amounts not greater
159.10 than those necessary to cover the reasonable costs of developing, reviewing, and acting
159.11 upon applications for agency permits and implementing and enforcing the conditions of the
159.12 permits pursuant to agency rules. Permit fees shall not include the costs of litigation. The
159.13 fee schedule must reflect reasonable and routine direct and indirect costs associated with
159.14 permitting, implementation, and enforcement. The agency may impose an additional
159.15 enforcement fee to be collected for a period of up to two years to cover the reasonable costs
159.16 of implementing and enforcing the conditions of a permit under the rules of the agency.
159.17 Any money collected under this paragraph shall be deposited in the environmental fund.

159.18 (b) Notwithstanding paragraph (a), the agency shall collect an annual fee from the owner
159.19 or operator of all stationary sources, emission facilities, emissions units, air contaminant
159.20 treatment facilities, treatment facilities, potential air contaminant storage facilities, or storage
159.21 facilities subject to a notification, permit, or license requirement under this chapter,
159.22 subchapters I and V of the federal Clean Air Act, United States Code, title 42, section 7401
159.23 et seq., or rules adopted thereunder. The annual fee shall be used to pay for all direct and
159.24 indirect reasonable costs, including legal costs, required to develop and administer the
159.25 notification, permit, or license program requirements of this chapter, subchapters I and V
159.26 of the federal Clean Air Act, United States Code, title 42, section 7401 et seq., or rules
159.27 adopted thereunder. Those costs include the reasonable costs of reviewing and acting upon
159.28 an application for a permit; implementing and enforcing statutes, rules, and the terms and
159.29 conditions of a permit; emissions, ambient, and deposition monitoring; preparing generally
159.30 applicable regulations; responding to federal guidance; modeling, analyses, and
159.31 demonstrations; preparing inventories and tracking emissions; and providing information
159.32 to the public about these activities.

159.33 (c) The agency shall set fees that:

(1) will result in the collection, in the aggregate, from the sources listed in paragraph (b), of an amount not less than \$25 per ton of each volatile organic compound; pollutant regulated under United States Code, title 42, section 7411 or 7412 (section 111 or 112 of the federal Clean Air Act); and each pollutant, except carbon monoxide, for which a national primary ambient air quality standard has been promulgated;

(2) may result in the collection, in the aggregate, from the sources listed in paragraph (b), of an amount not less than \$25 per ton of each pollutant not listed in clause (1) that is regulated under this chapter or air quality rules adopted under this chapter; and

(3) shall collect, in the aggregate, from the sources listed in paragraph (b), the amount needed to match grant funds received by the state under United States Code, title 42, section 7405 (section 105 of the federal Clean Air Act).

The agency must not include in the calculation of the aggregate amount to be collected under clauses (1) and (2) any amount in excess of 4,000 tons per year of each air pollutant from a source. The increase in air permit fees to match federal grant funds shall be a surcharge on existing fees. The commissioner may not collect the surcharge after the grant funds become unavailable. In addition, the commissioner shall use nonfee funds to the extent practical to match the grant funds so that the fee surcharge is minimized.

(d) To cover the reasonable costs described in paragraph (b), the agency shall provide in the rules promulgated under paragraph (c) for an increase in the fee collected in each year by the percentage, if any, by which the Consumer Price Index for the most recent calendar year ending before the beginning of the year the fee is collected exceeds the Consumer Price Index for the calendar year 1989. For purposes of this paragraph the Consumer Price Index for any calendar year is the average of the Consumer Price Index for all-urban consumers published by the United States Department of Labor, as of the close of the 12-month period ending on August 31 of each calendar year. The revision of the Consumer Price Index that is most consistent with the Consumer Price Index for calendar year 1989 shall be used.

(e) Any money collected under paragraphs (b) to (d) must be deposited in the environmental fund and must be used solely for the activities listed in paragraph (b).

(f) Permit applicants who wish to construct, reconstruct, or modify a project may ~~offer~~ request expedited permitting under this paragraph. An applicant requesting expedited permitting under this paragraph must agree to reimburse the agency for the costs of staff time or consultant services needed to expedite the preapplication process and permit development process through the final decision on the permit, including the analysis of

161.1 environmental review documents. The reimbursement ~~shall be~~ is in addition to permit
161.2 application fees imposed by law. ~~When the agency determines that it needs additional~~
161.3 ~~resources to develop the permit application in an expedited manner, and that expediting the~~
161.4 ~~development is consistent with permitting program priorities, the agency may accept the~~
161.5 ~~reimbursement.~~ The commissioner must first determine if existing agency staff is available
161.6 to work on the permit subject to the expedited permitting request. If the commissioner
161.7 determines that no agency staff is available to assign to the permit subject to the expedited
161.8 permitting request, then the commissioner may contract for permitting services. If the
161.9 commissioner determines that no agency staff is available and no contracting services are
161.10 available to assign to the permit subject to the expedited permit request, then the
161.11 commissioner may deny the expedited permitting request. The commissioner must give the
161.12 applicant an estimate of the timeline and costs to be incurred by the commissioner. The
161.13 estimate must include a brief description of the tasks to be performed, a schedule for
161.14 completing the tasks, and the estimated cost for each task. If the applicant agrees to the
161.15 estimated timeline and costs negotiated with the commissioner, the applicant and the
161.16 commissioner must enter into a written agreement ~~detailing the estimated costs for the~~
161.17 ~~expedited permit decision-making process to be incurred by the agency to proceed~~
161.18 accordingly. The agreement must also identify staff anticipated to be assigned to the project.
161.19 The agreement may provide that, if permitting is completed ahead of the schedule set forth
161.20 in the written agreement, the commissioner may retain any fees that would have been due
161.21 if the permitting had taken the time contemplated in the written agreement. Fees retained
161.22 by the commissioner under this paragraph are appropriated to the commissioner for
161.23 administering the commissioner's permitting duties. The commissioner must not issue a
161.24 permit until the applicant has paid all fees in full. The commissioner must refund any
161.25 unobligated balance of fees paid. Reimbursements accepted by the agency are appropriated
161.26 to the agency for the purpose of developing the permit or analyzing environmental review
161.27 documents. Reimbursement by a permit applicant shall precede and not be contingent upon
161.28 issuance of a permit; shall not affect the agency's decision on whether to issue or deny a
161.29 permit, what conditions are included in a permit, or the application of state and federal
161.30 statutes and rules governing permit determinations; and shall not affect final decisions
161.31 regarding environmental review.

161.32 (g) The fees under this subdivision are exempt from section 16A.1285.

161.33 Sec. 3. Minnesota Statutes 2024, section 116D.04, subdivision 2a, is amended to read:

161.34 Subd. 2a. **When prepared.** (a) Where there is potential for significant environmental
161.35 effects resulting from any major governmental action, the action must be preceded by a

162.1 detailed environmental impact statement prepared by the responsible governmental unit.

162.2 The environmental impact statement must be an analytical rather than an encyclopedic
162.3 document that describes the proposed action in detail, analyzes its significant environmental
162.4 impacts, discusses appropriate alternatives to the proposed action and their impacts, and
162.5 explores methods by which adverse environmental impacts of an action could be mitigated.
162.6 The environmental impact statement must also analyze those economic, employment, and
162.7 sociological effects that cannot be avoided should the action be implemented. To ensure its
162.8 use in the decision-making process, the environmental impact statement must be prepared
162.9 as early as practical in the formulation of an action.

162.10 (b) The board ~~shall~~ must by rule establish categories of actions for which environmental
162.11 impact statements and for which environmental assessment worksheets must be prepared
162.12 as well as categories of actions for which no environmental review is required under this
162.13 section. A mandatory environmental assessment worksheet is not required for the expansion
162.14 of an ethanol plant, as defined in section 41A.09, subdivision 2a, paragraph (b), or the
162.15 conversion of an ethanol plant to a biobutanol facility or the expansion of a biobutanol
162.16 facility as defined in section 41A.15, subdivision 2d, based on the capacity of the expanded
162.17 or converted facility to produce alcohol fuel, but must be required if the ethanol plant or
162.18 biobutanol facility meets or exceeds thresholds of other categories of actions for which
162.19 environmental assessment worksheets must be prepared. The responsible governmental unit
162.20 for an ethanol plant or biobutanol facility project for which an environmental assessment
162.21 worksheet is prepared is the state agency with the greatest responsibility for supervising or
162.22 approving the project as a whole.

162.23 (c) A mandatory environmental impact statement is not required for a facility or plant
162.24 located outside the seven-county metropolitan area that produces less than 125,000,000
162.25 gallons of ethanol, biobutanol, or cellulosic biofuel annually, or produces less than 400,000
162.26 tons of chemicals annually, if the facility or plant is: an ethanol plant, as defined in section
162.27 41A.09, subdivision 2a, paragraph (b); a biobutanol facility, as defined in section 41A.15,
162.28 subdivision 2d; or a cellulosic biofuel facility. A facility or plant that only uses a cellulosic
162.29 feedstock to produce chemical products for use by another facility as a feedstock is not
162.30 considered a fuel conversion facility as used in rules adopted under this chapter.

162.31 (d) The responsible governmental unit ~~shall~~ must promptly publish notice of the
162.32 completion of an environmental assessment worksheet by publishing the notice in at least
162.33 one newspaper of general circulation in the geographic area where the project is proposed,
162.34 by posting the notice on a website that has been designated as the official publication site
162.35 for publication of proceedings, public notices, and summaries of a political subdivision in

163.1 which the project is proposed, or in any other manner determined by the board and ~~shall~~
163.2 must provide copies of the environmental assessment worksheet to the board and its member
163.3 agencies. Comments on the need for an environmental impact statement may be submitted
163.4 to the responsible governmental unit during a 30-day period following publication of the
163.5 notice that an environmental assessment worksheet has been completed. The responsible
163.6 governmental unit may extend the 30-day comment period for an additional 30 days one
163.7 time. Further extensions of the comment period may not be made unless approved by the
163.8 project's proposer. The responsible governmental unit's decision on the need for an
163.9 environmental impact statement must be based on the environmental assessment worksheet
163.10 and the comments received during the comment period, and must be made within 15 days
163.11 after the close of the comment period. The board's chair may extend the 15-day period by
163.12 not more than 15 additional days upon the request of the responsible governmental unit.

163.13 (e) An environmental assessment worksheet must also be prepared for a proposed action
163.14 whenever material evidence accompanying a petition by not less than 100 individuals who
163.15 reside or own property in ~~the state~~ a Minnesota county where the proposed action will be
163.16 undertaken or in one or more adjoining counties, submitted before the proposed project has
163.17 received final approval by the appropriate governmental units, demonstrates that, because
163.18 of the nature or location of a proposed action, there may be potential for significant
163.19 environmental effects. Petitions requesting the preparation of an environmental assessment
163.20 worksheet must be submitted to the board. The chair of the board ~~shall~~ must determine the
163.21 appropriate responsible governmental unit and forward the petition to it. A decision on the
163.22 need for an environmental assessment worksheet must be made by the responsible
163.23 governmental unit within 15 days after the petition is received by the responsible
163.24 governmental unit. The board's chair may extend the 15-day period by not more than 15
163.25 additional days upon request of the responsible governmental unit.

163.26 (f) Except in an environmentally sensitive location where Minnesota Rules, part
163.27 4410.4300, subpart 29, item B, applies, the proposed action is exempt from environmental
163.28 review under this chapter and rules of the board, if:

163.29 (1) the proposed action is:

163.30 (i) an animal feedlot facility with a capacity of less than 1,000 animal units; or

163.31 (ii) an expansion of an existing animal feedlot facility with a total cumulative capacity
163.32 of less than 1,000 animal units;

(2) the application for the animal feedlot facility includes a written commitment by the proposer to design, construct, and operate the facility in full compliance with Pollution Control Agency feedlot rules; and

(3) the county board holds a public meeting for citizen input at least ten business days before the Pollution Control Agency or county issuing a feedlot permit for the animal feedlot facility unless another public meeting for citizen input has been held with regard to the feedlot facility to be permitted. The exemption in this paragraph is in addition to other exemptions provided under other law and rules of the board.

(g) The board may, before final approval of a proposed project, require preparation of an environmental assessment worksheet by a responsible governmental unit selected by the board for any action where environmental review under this section has not been specifically provided for by rule or otherwise initiated.

(h) An early and open process must be used to limit the scope of the environmental impact statement to a discussion of those impacts that, because of the nature or location of the project, have the potential for significant environmental effects. The same process must be used to determine the form, content, and level of detail of the statement as well as the alternatives that are appropriate for consideration in the statement. In addition, the permits that will be required for the proposed action must be identified during the scoping process. Further, the process must identify those permits for which information will be developed concurrently with the environmental impact statement. The board ~~shall~~ must provide in its rules for the expeditious completion of the scoping process. The determinations reached in the process must be incorporated into the order requiring the preparation of an environmental impact statement.

(i) The responsible governmental unit ~~shall~~ must, to the extent practicable, avoid duplication and ensure coordination between state and federal environmental review and between environmental review and environmental permitting. Whenever practical, information needed by a governmental unit for making final decisions on permits or other actions required for a proposed project must be developed in conjunction with the preparation of an environmental impact statement. When an environmental impact statement is prepared for a project requiring multiple permits for which two or more agencies' decision processes include either mandatory or discretionary hearings before a hearing officer before the agencies' decision on the permit, the agencies may, notwithstanding any law or rule to the contrary, conduct the hearings in a single consolidated hearing process if requested by the proposer. All agencies having jurisdiction over a permit that is included in the consolidated hearing ~~shall~~ must participate. The responsible governmental unit ~~shall~~ must establish

165.1 appropriate procedures for the consolidated hearing process, including procedures to ensure
165.2 that the consolidated hearing process is consistent with the applicable requirements for each
165.3 permit regarding the rights and duties of parties to the hearing, and ~~shall~~ must use the earliest
165.4 applicable hearing procedure to initiate the hearing. All agencies having jurisdiction over
165.5 a permit identified in the draft environmental assessment worksheet scoping document must
165.6 begin reviewing any permit application upon publication of the notice of preparation of the
165.7 environmental impact statement.

165.8 (j) An environmental impact statement must be prepared and its adequacy determined
165.9 within 280 days after notice of its preparation unless the time is extended by consent of the
165.10 parties or by the governor for good cause. The responsible governmental unit ~~shall~~ must
165.11 determine the adequacy of an environmental impact statement, unless within 60 days after
165.12 notice is published that an environmental impact statement will be prepared, the board
165.13 chooses to determine the adequacy of an environmental impact statement. If an environmental
165.14 impact statement is found to be inadequate, the responsible governmental unit has 60 days
165.15 to prepare an adequate environmental impact statement.

165.16 (k) The proposer of a specific action may include in the information submitted to the
165.17 responsible governmental unit a preliminary draft environmental impact statement under
165.18 this section on that action for review, modification, and determination of completeness and
165.19 adequacy by the responsible governmental unit. A preliminary draft environmental impact
165.20 statement prepared by the project proposer and submitted to the responsible governmental
165.21 unit must identify or include as an appendix all studies and other sources of information
165.22 used to substantiate the analysis contained in the preliminary draft environmental impact
165.23 statement. The responsible governmental unit ~~shall~~ must require additional studies, if needed,
165.24 and obtain from the project proposer all additional studies and information necessary for
165.25 the responsible governmental unit to perform its responsibility to review, modify, and
165.26 determine the completeness and adequacy of the environmental impact statement.

165.27 Sec. 4. Minnesota Statutes 2024, section 116D.04, subdivision 2b, is amended to read:

165.28 Subd. 2b. **Project prerequisites.** (a) If an environmental assessment worksheet or an
165.29 environmental impact statement is required for a governmental action under subdivision
165.30 2a, a project may not be started and a final governmental decision may not be made to grant
165.31 a permit, approve a project, or begin a project, until:

165.32 (1) a petition for an environmental assessment worksheet is dismissed;

165.33 (2) a negative declaration has been issued on the need for an environmental impact
165.34 statement;

(3) the environmental impact statement has been determined adequate; or

(4) a variance has been granted from making an environmental impact statement by the environmental quality board.

(b) Nothing in this subdivision precludes a local unit of government from beginning to review a feedlot permit application for a feedlot subject to environmental review under this chapter.

Sec. 5. **SCOPING ENVIRONMENTAL ASSESSMENT WORKSHEET NOT REQUIRED FOR PROJECTS THAT REQUIRE A MANDATORY ENVIRONMENTAL IMPACT STATEMENT.**

(a) The Environmental Quality Board must amend Minnesota Rules, part 4410.2100, as follows:

(1) to provide that an environmental assessment worksheet does not need to be prepared for a project that falls within a mandatory environmental impact statement category under Minnesota Rules, part 4410.4400, or other applicable law; and

(2) to provide that a scoping process undertaken under Minnesota Rules, part 4410.2100, for a project that falls within a mandatory environmental impact statement category must be completed no later than 280 days after publication of the notice of availability of a scoping document in the EQB Monitor.

(b) The board may use the good cause exemption under Minnesota Statutes, section 14.388, subdivision 1, clause (3), to adopt rules under this section, and Minnesota Statutes, section 14.386, does not apply except as provided under Minnesota Statutes, section 14.388.

Sec. 6. **INTENT.**

The legislature recognizes the need to retain and grow the state's economy and vital infrastructure to keep Minnesota competitive on a national and global level. This growth requires innovation and creativity, which will be achieved while protecting our environment and natural resources as prescribed under current law. It is therefore the intent of the legislature in enacting this article that the state will meet or exceed efficiency goals, modernize existing regulatory systems, and communicate clearly to permit applicants and stakeholders to ensure a predictable, transparent, and fair permitting and environmental review process.

167.1 Sec. 7. **REPORT ON USE OF AUTHORITY TO EXTEND TIMELINE FOR**
167.2 **CERTAIN AGENCY ACTIONS.**

167.3 By March 1, 2028, the Board of Water and Soil Resources must report to the chairs and
167.4 ranking minority members of the legislative committees with jurisdiction over environment
167.5 and natural resources policy on the number of extensions noticed under Minnesota Statutes,
167.6 section 15.99, subdivision 3, paragraph (f), that are made for any decision under Minnesota
167.7 Rules, chapter 8420, between January 1, 2026, and December 31, 2027. A local government
167.8 unit must supply the board with information necessary to prepare the report required by this
167.9 section. The report must also include information on all other decisions made under
167.10 Minnesota Rules, chapter 8420, for requests that are not subject to Minnesota Statutes,
167.11 section 15.99, providing statistics on the time from submission of a complete wetland
167.12 boundary and type or wetland replacement plan application to the government unit
167.13 responsible for making the decision on the application to the approval or denial of the
167.14 application. The government unit responsible for making the decision must supply the board
167.15 with information necessary to prepare the report required by this section.
