

I am against the proposed change of the MN state Constitution

I do agree that every child has the right to an education. As a college graduate with a BS in Elementary Education I believe that learning is a vital part of living. As an educator I have come to realize that learning happens not only in the classroom but in every experience of life. As a mother of 7 I have seen how important it is to cultivate a love of learning in the home as well as in the classroom.

Across those seven children we have experienced public school at home (K12), home school, public school and private boarding school. As parents we have been free to choose the best option for our students to fit their needs. 5 of my students have finished high school. One has two college degrees, one has an associates degree, one has a management position, one is at University of Minnesota, and one has been hampered by covid.

Mandating a publicschool education is not in the best interest of all students.
