Metropolitan Regional Parks and Trails System

FY 2026-2027

Aquatic Invasive Species Funding S.F. 2107, Kunesh, Pha, Johnson Stewart H.F. 2218 , Falconer, Myers

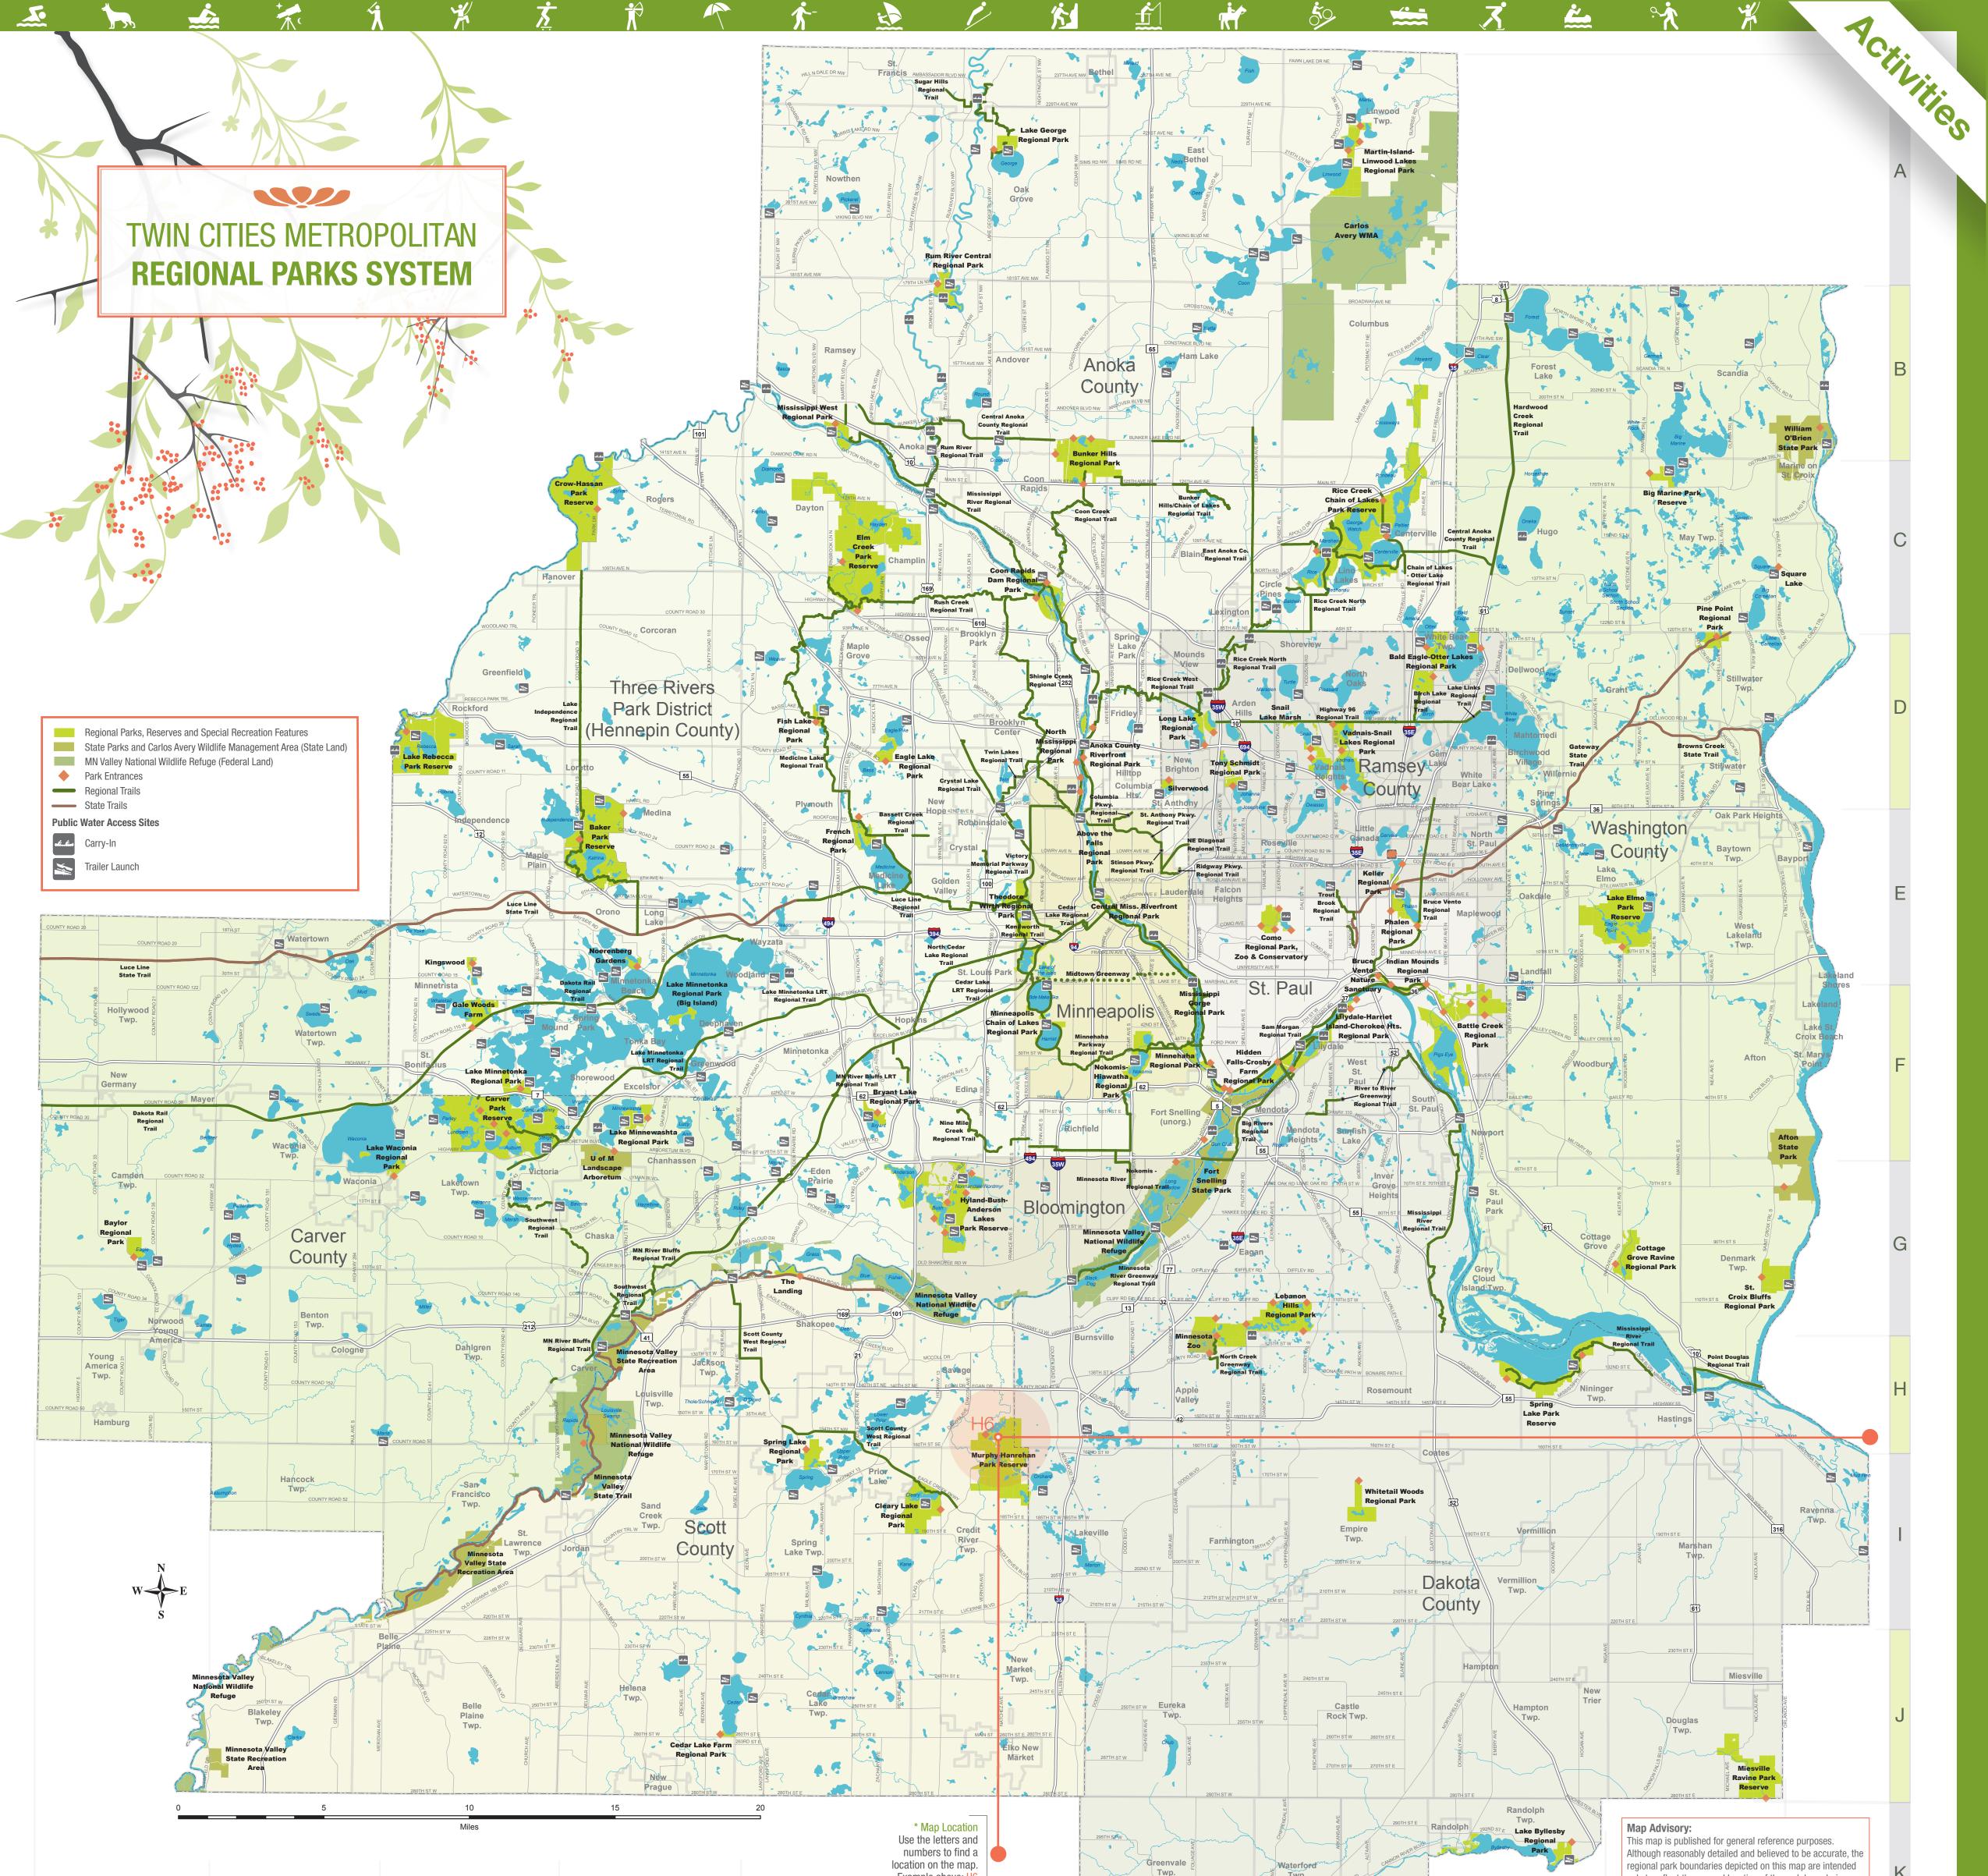

Aquatic Invasive Species (AIS) negatively impact Minnesota ecosystems, economies, and ways of life. AIS began arriving in Minnesota in the 1800s, but the current rate of invasion is increasing. As a state known as the "Land of 10,000 Lakes", the continued spread of newer species, such as Starry Stonewort, have significant impacts on the lakes, property owners owners, and the people who enjoy them.

The governor's budget reduces the county aquatic invasive species prevention aid program by 50%. **The Metropolitan Regional Parks and Trails System's implementing agencies request \$1.5 million in funds to reduce the spread of Aquatic Invasive Species** on public water bodies located along and within the regional park system in SF2107 authored by Senator Kunesh and in HF2218 authored by Representative Falconer.

Funds for the request would be available for use towards prevention, containment, control, and enforcement for managing aquatic invasive species. This include funding for AIS inspections, lake treatments for AIS currently impacting water bodies located within and along the regional park system, lake surveys, rapid response planning, and enforcement of laws around AIS.

More funding is necessary to protect and preserve local lake ecosystems and the economies that support them. An ounce of prevention is worth a pound of chemical treatments in Minnesota's public waters.

Metropolitan Regional Parks and Trails System Aquatic Invasive Species Funding

Dear Honorable Legislators:

On behalf of the 10 implementing agencies that make up the Metropolitan Regional Parks and Trails System, we are writing to request your support to fully fund the department of revenue county Aquatic Invasive Species (AIS) prevention aid program that was recommended to be reduced in the governor's budget.

In addition to fully funding county AIS prevention aid program, the regional park agencies are requesting support for supplementing the county AIS prevention aid program in the amount of \$1.5 million from the general fund for grants to implementing agencies of the Metropolitan Council Regional Parks System for initiatives to reduce the spread of Aquatic Invasive Species (AIS) authored by Senator Kunesh in SF 2107 and by Representative Falconer in HF2218. Funds for the supplemental request would be available for use towards prevention, containment, control, and enforcement for managing aquatic invasive species. This request is for one-time appropriation and is available until June 30, 2027.

AIS began arriving in Minnesota in the 1800s, but the current rate of invasion is increasing. AIS has negatively impacted Minnesota's ecosystems, economies, and way of life. The continued spread of newer species, such as Starry Stonewort, have significant impacts on the lakes, property owners, and the people who enjoy them.

The Metropolitan Regional Parks System was established by the Legislature to preserve and protect the last great places for outdoor recreation in the Twin Cities Metropolitan Area. Because 93% of state parks and recreation areas are located outside of the Twin Cities, the regional parks function as the state parks of the Metro Area by providing comparable natural settings and recreational opportunities. More than 69 million visits were made to the system in 2023, and the number continues to grow annually.

The structure and visitation of the regional parks makes this a system of regional and statewide significance. Research data from the Minnesota Aquatic Invasive Species Research Center shows boats from across the state travel from a wide variety of water bodies prior to launching at lakes located along and within the regional park system. Funding from the request will go towards a variety of lake specific needs where metropolitan regional park boat launches are located. Funds will be used towards inspections, education, early detection, rapid response to AIS discovery, enforcement of violations, and improved ecological benefits such as lake treatments for areas where AIS already exists.

We thank you for your thoughtful consideration of fully funding the county AIS prevention aid program and the additional supplemental request for \$1.5 million in general fund appropriations to manage species that have an impact on the environment, economy, and Minnesota's way of life. Funding this request will go directly towards prevention and management of the water bodies people from across the region and state come to visit and care for. Thank you again for your time and consideration.
