

We must combat this war on cannabis prohibition immediately, and join the other states who have fully legalized. The state of Minnesota will see great financial revenue loss to surrounding states who have chosen to legalize, if Minnesota does not pick up the pace. As a Shamanic Healer, the use of cannabis is important in our work of healing and helping victims of trauma confront their fears in a safe and controlled mental state. This wonderful flower has given so many the hope of freedom from their mental health issues, and painful traumatic pasts. Let's release the stigma of this being a drug and use it not only medically, but recreationally, free from fear of legal action with use.

With much respect,
A Cannabis Advocate
Yogi Cass
