**LANGUAGE ELEMENTS FOR DISCUSSION**  
**(TO INFORM PROPOSED APPLICANT DATA AMENDMENT)**

NOTES: MNCOGI would like to see more data about applicants for cannabis business licenses classified as “public” (similar to how applicants for various liquor business licenses have much publicly available data).

The two lists below contain language from HF 100 describing all of the many data elements collected from applicants for cannabis businesses, per the bill. MNCOGI had broken them into two separate lists — one list of applicant data that should be “public,” and one proposed list that could be classified as “not public” (such as security-related data and sensitive financial data).

These lists are organized by the bill sections, for ease of reference. If an amendment to the applicant data section is written, it should boil down the “not public” data elements into a single list that can be placed into the “not public” data classification section (starting at line 39.30), along with the other “not public” classifications that are already in the bill. The amendment would essentially change what is now paragraph (1) to include a list of specific “not public” applicant data, leaving the other applicant data “public.”

Please note that there is some repetition and overlap in the various data elements listed below, as different sections of HF 100 governing applications contain similar language. This language can be consolidated and streamlined in an amendment.
