Subject: MRRA

Dear Member of the Public Safety Committee

Using the MRRA will save money, increase safety, and fund victims and programing why are you against that?

Everyone should have the MRRA not less people

Why is the MRRA still not in place? And why are new policies going to exclude upwards of 50% of eligible people regardless of what they do?

I am extremely disappointed in the fact that the MRRA is not in place yet and I hope that you all do the right thing the honorable action to not only stay true to the original agreement but understand how devastating the delay is becoming to people impacted the most.

Thank you
