

# **DHS health care updates**

---

**House Health and Human Services  
Finance Committee  
November 21, 2011  
Scott Leitz  
Assistant Commissioner  
Health Care**

Minnesota Department of **Human Services**

# Overview of topics covered

- Competitive bidding for MCO contracts
- Health Care Delivery System (HCDS) demonstration
- Dual eligibles demonstration
- Managed care for people with disabilities
- Healthy Minnesota Contribution program

# **Managed care organization competitive bidding**

- The 2011 Governor's budget and 2011 HHS omnibus bill established a two-year competitive bidding pilot for the Twin Cities metropolitan area
- Populations in the pilot will be families and children and non-disabled adults under 65
- The pilot starts January 2012

# Background on competitive bidding

- The implementation of competitive bidding was a change from past procurement processes
  - Traditionally, rates have been rate-set by DHS
  - Competitive bidding introduced market competition
- The five plans that served the Twin Cities metro area in 2011 participated in competitive bidding for 2012 contracts
- 2011 initiative competitively bid rates for seven-county metro for families with children
- Results: **\$175 million in state savings for FY 2012**

# Competitive bidding process

- RFP issued April 6, two components
  - Technical
  - Cost bid components
- Proposals submitted by current plans for each county were evaluated and scored; counties participated in scoring process
- Based on the bids submitted, letters of intent to contract were issued Aug. 30
- Negotiations began in September and are nearly final

# Competitive bidding results

- HealthPartners and UCare scored highest (based on combined cost bid and technical bid) in all seven counties
- To ensure capacity of provider networks and plan administrative functions, Blue Plus added in Dakota and Ramsey; Medica added in Hennepin.
- Enrollees will have access to substantially the same providers, even if their current plan is not an option

# Open enrollment/transition work

- Transition work is a high priority
- Approximately 78,000 enrollees will need to change health plans for January 2012
- DHS facilitated meeting with county staff and health plans for enrollee transition planning and open enrollment
- Plans preparing to send out member cards early so enrollees can access services January 1
- Collaborative work with plans and counties has been key to ensuring a smooth transition for enrollees

# Health Care Delivery System (HCDS) demo

- The 2010 legislature authorized DHS to develop and issue an RFP for a Health Care Delivery System (HCDS) demonstration
- The demonstration will test alternative and innovative health care delivery systems
- It provides flexibility to encourage innovation and uses different levels and types of financial arrangements

# HCDS demo goal

Impact the quality and total cost of care through new care models and strategies

- Provide the full scope of primary care services and coordinate care in a comprehensive and continuous manner, building off health care homes
- Engage and partner with patients and families
- Develop formal community partnerships to encourage integration with social services
- Allow providers to share in the risks and gains of designing care models that improve care and lower costs

# HCDS demo - the model

- Multiple payment models allow participation of both small and large providers
- Duration of three years
- Flexible amounts of risk/gain for providers
  - First year is gain-sharing only
  - Risk phased-in during years 2 and 3
- Alignment of payment at the provider system level across FFS and managed care
- Future models will include additional providers and populations

# HCDS process and timeline

- April 2011: RFI issued
- June 30, 2011: RFP published
- July-October: information sharing, Q and A with providers, feedback
- November 4, 2011: proposals due
- April 2012: demo projects begin (pending federal approval)

# HCDS demo – quality and data

- Financial gains will be contingent on performance on a core set of measures in the areas of clinical quality and patient experience – already collected by MN Community Measurement
- Delivery systems can propose additional quality measures to demonstrate value to populations and communities
- DHS will provide timely and actionable data to participating delivery systems

# HCDS current status

- DHS received nine proposals – diverse in geography and organization
- Decisions on intent to contract planned for early December
- Planning work under way
  - Actuarial services
  - Data analysis
  - Federal authority for fee-for-service population

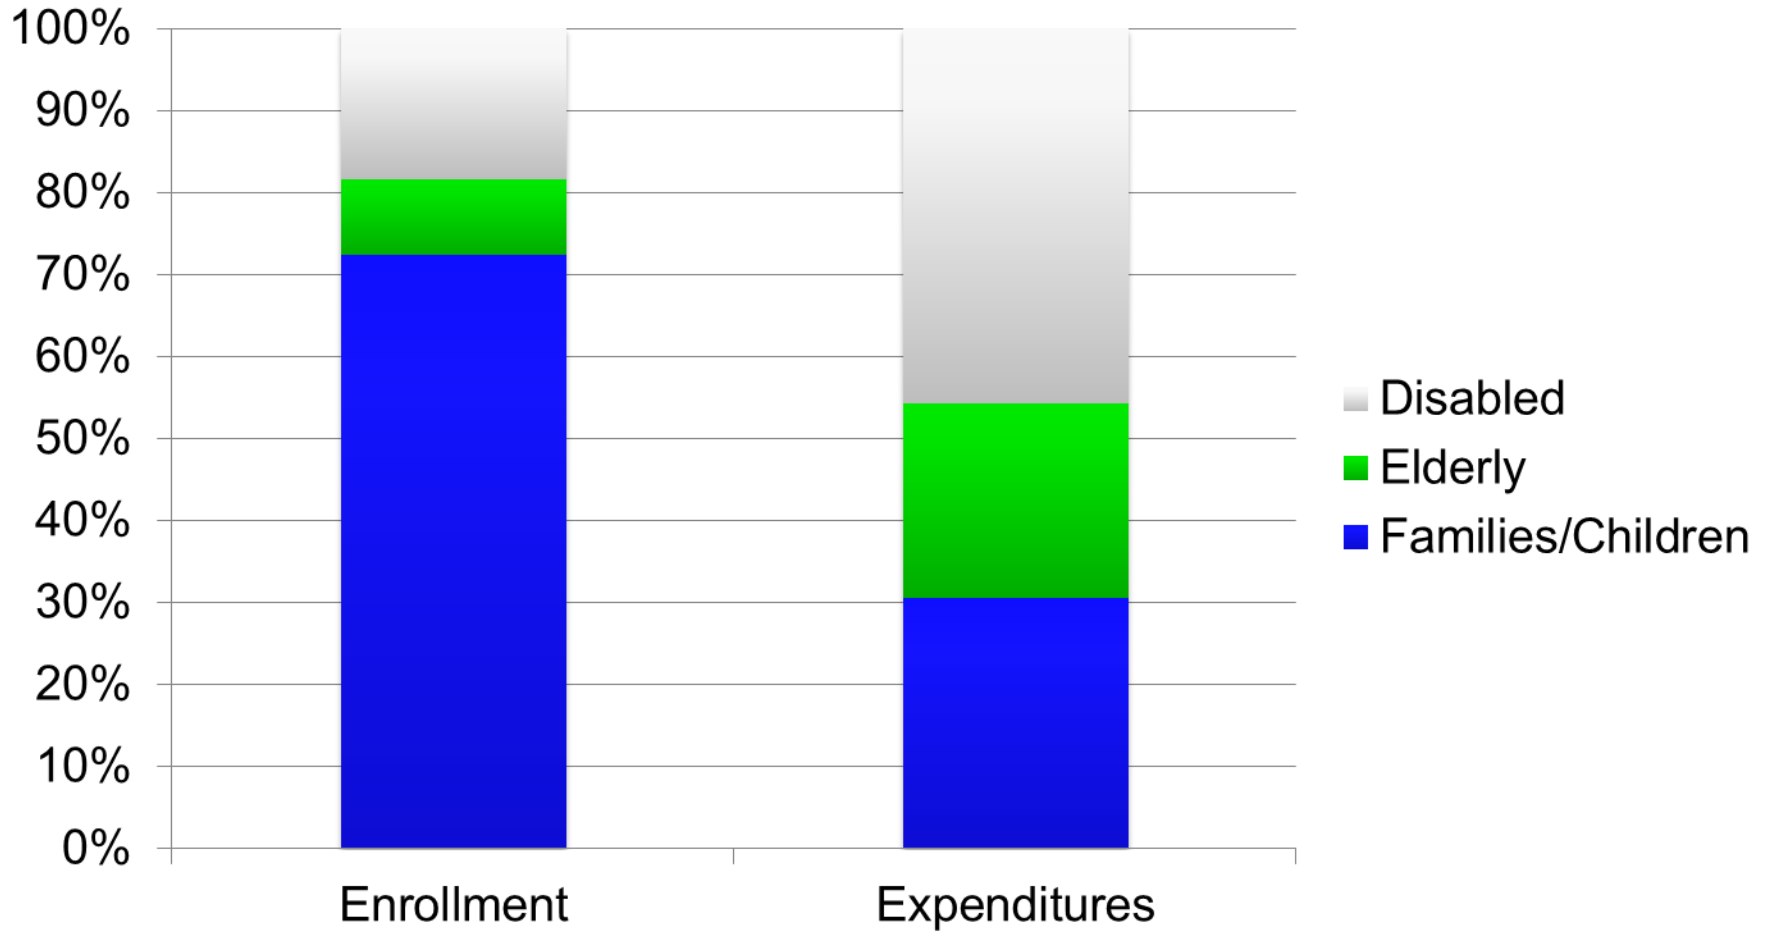

# Dual eligibles overview

- Most Medicaid seniors and about 50% of people with disabilities in Medicaid are dually eligible
- Dual eligibles are among the sickest and poorest individuals with high needs for long-term care and mental health services
- Their care is fragmented and inefficient
- They must navigate two separate financing systems with conflicting information and payer and provider payment incentives
- State Medicaid innovations resulting in health care savings (physician, hospital) accrue to Medicare

# Dual eligibles overview

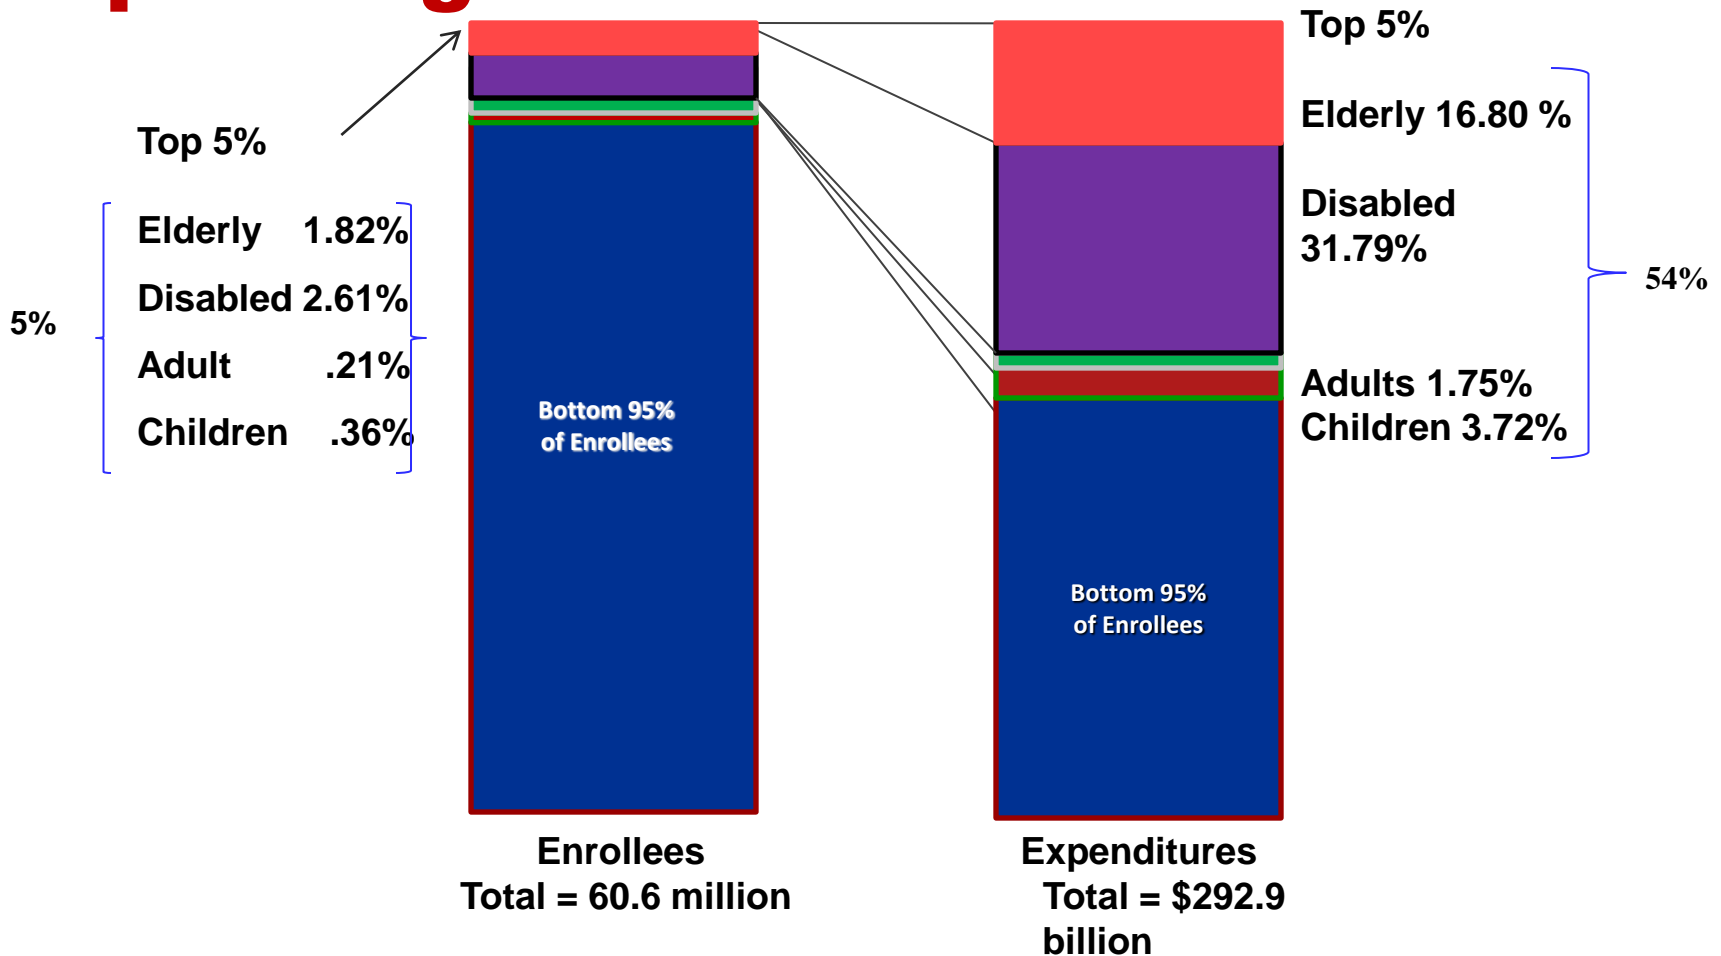

- Dual eligibles – about 39% of Medicaid spending; 15.3% enrollment nationally
- In Minnesota, about 106,600 fully dually eligible people with Medicaid spending of about \$2.8 billion in FY 2010
- Minnesota was first state to develop a statewide integrated model for care and financing for dual eligibles in 1995 (Minnesota Senior Health Options)
- Great interest in improving the quality and efficiency of care for dual eligibles through expansion of similar models

# Medicaid expenditures are concentrated with elderly and disabled

# Top 5% of enrollees account for more than Half of Medicaid spending

# Dual eligible demonstration

- Two new CMS initiatives for more efficient integrated models of care for dual eligibles
  - 15 states (including MN) given contracts with CMS to develop integrated service and payment models for dual eligibles
  - CMS invitation for integrated financing models; MN one of 38 states to submit letter of intent to pursue further discussion
- CMS expects models with full integration of Medicaid and Medicare services, as well as integration of medical care, behavioral health, long-term care and community services
  - Builds off existing Medicare-integrated programs for seniors and people with disabilities
  - Allows states to share in savings to Medicare
  - Builds on health care home and HCDS models

# Managed care for people with disabilities

- The 2011 HHS omnibus bill required enrollment of people with disabilities into managed care, with an opt-out provision
- The enrollment of people with disabilities from MA fee-for-service to managed care is being phased in starting Jan. 1, 2012
- Those eligible for enrollment will be asked to join a health plan participating in Special Needs BasicCare (SNBC) but may opt out of enrollment.

# Managed care for people with disabilities

- SNBC is offered by five health plans and currently has 6,000 enrollees
- SNBC has been operating since 2008
- An estimated 78,200 adults and 11,500 children with disabilities will be asked to enroll
- People are being given the opportunity to opt out prior to enrollment in a plan

# Managed care for people with disabilities

- People may opt out of managed care enrollment or disenroll at any time and return to fee-for-service
- Budgeting for the law assumed enrollment would be phased in between January and July 2012 and that 50% would choose to opt out
- The goal of SNBC is to promote access to primary and preventive care, including coordination with Medicare benefits
- Under SNBC, most long-term care services continue to be provided through MA FFS

# Managed care for people with disabilities

- Information will be mailed to potential enrollees 40-60 days before enrollment date
- Letters sent to the first group Nov. 7-14
- DHS is working closely with stakeholders and counties to ensure a smooth transition for those joining health plans
- Stakeholder meetings are being held to discuss implementation
- Additional Information is available on the DHS website: [www.dhs.state.mn.us/SNBC](http://www.dhs.state.mn.us/SNBC)

# Healthy Minnesota Contribution program

- Established by 2011 HHS omnibus bill
- Replaces current MinnesotaCare program for enrollees who are adults without children with income at or above 200% FPG
- As of July 1, 2012, they will receive a monthly defined contribution to purchase coverage under a private health plan or the Minnesota Comprehensive Health Association (MCHA)
- Approximately 3,500 people will qualify

# Healthy Minnesota Contribution program

- MinnesotaCare eligibility requirements continue to apply
- The contribution is calculated on a sliding scale based on age and household income
- Eligible applicants and enrollees must be referred to professional insurance agent associations (broker associations)

# Healthy Minnesota Contribution program

- A joint DHS/Commerce project team is working to implement the legislation
- Stakeholder meetings with broker associations, health plans and MCHA are planned to discuss implementation issues
- Other project issues
  - Notifying enrollees, broker referrals and premium payment in June to avoid coverage gaps
  - Agreement by DHS and health plans on an enrollment and premium payment process
  - System changes and worker training
