Summary

This bill directs owners or operators of underground lines and facilities (e.g., for communications, natural gas, petroleum, power, water, and sanitary sewer systems) to provide quarterly reports to the Office of Pipeline Safety. The required reporting is on excavation notices received from a statewide notification center (known as Gopher State One Call) as well as underground facility damages. Some underground facility owners and operators with fewer than 5,000 notifications annually are exempt from the reporting.
