

# Hospital Quality Reporting Initiatives

over

# CMS Quality Transparency: From Zero to 65 in 9 years

*Strive to balance measurement & performance improvement*

1. Process measures for:

- Heart Failure
- Pneumonia
- Heart Attacks
- Surgical Care
- Pediatric Asthma

2. HCAHPS – Patient experience ratings

3. Healthcare associated infections, reported to CDC

4. Participation in clinical databases for:

- Cardiac Surgery
- Stroke
- Nursing-sensitive indicators
- General surgery

5. Claims-based measures

- 30-day mortality for heart failure, heart attack, and pneumonia
- 30-day readmissions for heart failure, heart attack, and pneumonia
- Patient safety indicators (e.g. post-op DVT)
- Hospital acquired conditions (e.g. pressure ulcers)
