

Hi my name is Ja-Ia Lee, I'm 14 year old. 3 things about myself is that I love rollerskating then I also like Hoverboarding. Another thing about me is that I want to work hard and go to collage for high degrees.

Ms. PaDee has help me learn ways to calm down when I'm angry, made me like Journaling about things related in life. She help made me confident on things, she made me enjoy school with my friends. She also made me have a closer relationship with my friends. The program or class for youth is important cause it help us younger generation do activity; and learn about something new that will help us later on in life.

Something that can be improved ^{about} is the kids day because of the program I feel better instead of being mad I can write it on a Journal and forget about it. It can improve Ms. PaDee program to reach other schools and help them. It can improve the activity of going somewhere for an assignment to help teach the kid more about that topic they are learning of.
