Summary

Appropriates funds from the data security account to the Office of the Legislative Auditor.

The data security account was created in 2014. It is funded through deposits made by the Department of Public Safety: DPS is required to deposit 30 percent of the fees it charges for the bulk sale of motor vehicle registration data. Though the account was created with an intent to support the work of the legislative auditor in reviewing certain uses of the bulk motor vehicle data sales system, a governor's 2014 veto of the appropriation from this account has prohibited the OLA from accessing the funds. Specific required uses of the funds are eliminated in this bill.
