

Hi! I think having full legalization of cannabis can benefit everyone in a way even if they do not use it themselves. It can create tons of jobs, be taxed to provide money for schools, nursing homes, fix and keeping our streets clean, cleaning rivers/lakes, and many more uses from having taxable cannabis in MN. It would also be beneficial for medical cannabis users to have more affordable medicine. I watch my father and my uncle struggle to afford their medication but it is very helpful for them. I know my grandmother could've benefited from it before she died from cancer. I would rather enjoy cannabis than drinking. I find drinking to be dangerous and uncomfortable as I take blood thinners and can't enjoy alcohol anyways. Thank you for taking the time to read this.
