

Nancy Conley

We have been harmed by the increasingly hostile actions by the Minnesota Animal Health, MNDNR, AND legislators that have created regulations and rules that increase cost and reduce our rights to farm as we have a constitutional right to. These people and state departments have taken away our rights with out biological or lawful processes. I cannot even calculate the total loss of income but can relay that this has caused aguish and mental stress to the point it is hard to continue a great business we started with plans that were well founded, now dashed to pieces

If I had been given adequate time I could have been more specific.
