

Reform of Local Government Funding of Human Services

2009 Laws, Chapter 88, Article 2, Section 48 directs the commissioner of human services to develop a proposal to reform local government funding of human services in consultation with county representatives, organizations that advocate for people who receive the services and the commissioner of revenue. The proposal would be directed at funding of all mandated health and human services and would include a consolidated local property tax contribution. A key goal of this proposal would be to assure that all eligible citizens have equal access to mandated services. The legislation is one of several initiatives directed at mandates or county redesign that were passed in the 2009 session.

This report provides a summary overview of county human services costs by major category. More detailed information on county social services costs is presented since social services costs represent the largest component of the county share of human services costs. These costs vary quite widely by county which makes it difficult to implement the funding model anticipated by the statute. Adequate exploration of such a model would require substantial resources for data collection and analysis.

Local Funding Model:

The legislation envisions a funding mechanism called a “consolidated local property tax contribution” which would be the foundation for the reform of the local government funding of human services. The scope of the proposal is to encompass “all mandated health and human services.” The report will not deal with health or social services programs or functions administered by the Minnesota Department of Health or Corrections through counties. but rather will include only those programs and functions administered by the Department of Human Services through counties. In addition, this report will include all programs and activities of counties in human services.

Mandates

The term “mandate” is not defined in the legislation. In general terms, a mandate can arise “from statutes, court decisions, and administrative regulations or orders that demand action from “subordinate” governments.”¹ While the study language suggests that human services spending can be divided into mandated vs. non-mandated, mandates aren’t that fixed. Each mandate comes with a different set of expectations and consequences, and varying degrees of flexibility. For purposes of this analysis, DHS will use the list of Essential (Mandated) Services created under the State-County Results, Accountability and Service Delivery Reform Act (Minnesota Statutes Chapter 402A). That act established a Steering Committee on Performance and Outcome Reforms which established a list of essential human services (mandated by federal or state government.) The steering committee consists of county commissioners, county human services directors, program advocates and human services staff. The list of Essential (Mandated) Services was approved by the steering committee on September 30, 2009. The list is summarized in the appendix. A link to the complete list of [essential \(mandated\) services](#) is provided here. This material is also accessible on the DHS Web site in the Partners and Providers theme under “County redesign.”

Components of County Human Services Costs

The Minnesota County Human Services Cost Report is prepared annually and represents the services carried out by county human services agencies, county sub-contractors and in some cases by DHS itself on behalf of counties. Costs are categorized in three broad categories: economic support, health care, and social services. For the most part both the support and health care categories represent forecasted programs that are equitably available across the state. These programs are funded by the state and federal governments. In general, the county expenses in these programs reflect paying the local share of administration including administration of the child support program. Social service programs have greater county participation. (Table 1)

Calendar 2008 Amount (millions)	Total	Support	Health Care	Social Services
Federal	4,130	556	2,391	1,184
State	4,136	205	2,606	1,324
County	653	116	59	478
Miscellaneous	125	60	-	65
total	9,044	937	5,056	3,051
Share (percent)

County	7%	12%	1%	16%
Miscellaneous	1%	6%	0%	2%

Minnesota Department of Human Services, Minnesota County Human Services Cost Report for Calendar Year 2008.

Equalization and Access

Legislation clearly states that the funding mechanism shall “ensure that all eligible citizens have equal access to mandated services.” As was mentioned, most of the funding that flows from the Department of Human Services through counties does ensure an equitable benefit for persons or families in like circumstances. Through the state-funded MAXIS eligibility system, MMIS claims processing system and local county offices most benefits and services are available to eligible applicants without regard to location. For the most part, the state pays for all benefits and services costs for health care and income support programs. Funding for these large programs was fully assumed by the state in the property tax reform legislation passed in 1989.² Full state funding of these programs, including assumption of program growth costs, has reduced property tax burdens and especially benefitted counties with low tax bases and larger proportions of needy families and individuals.

Counties pay for administration of many programs including eligibility and other client assessments. Where these determinations benefit federal programs, counties receive federal funds to offset part of the cost of administration. This reimbursement is typically 50 percent. In some cases, counties provide the services and are reimbursed fully by state and federal funds. Regardless of funding source, other factors can impact access, for example disparate administrative staffing levels.

² The “state takeover” of county share included 12 programs. Of these the major programs were Medical Assistance and related waiver programs, General Assistance and General Assistance Medical Care, Aid to Families with Dependent Children (now TANF), Minnesota Supplemental Aid and Group Residential Housing. Until 1991, counties paid a partial share of these major programs ranging from under 5 percent to 25 percent. In 1991, county HACA was reduced by approximately \$140 million in exchange for the state assuming the county share. Because of cash-flow differences between the HACA payment date the regular cash-flow needs for paying providers claims and client benefits, the state and counties shared in the cost of moving to concurrent funding through a phased schedule covering a number of years. (Laws of Minnesota 1989, 1st Special Session, Chapter 1, Article 16.)

Equalization and Access: Social Services

Unlike the health care and economic support benefits and services with limited county shares that were assumed by the state in the 1989 property tax reform, social services have a hodge-podge of funding.³ The basic categories of social services include Children Services, Mental Health Services, Adult Services, Child Care Services, Developmental Disability Services, and Chemical Dependency Services. The level of county contribution varies greatly within these services. Total social services spending in calendar year 2008 was over \$3 billion (Table 2). Of the county spending in social services, Children’s Services and Mental Health are by far the largest categories, accounting for over 70 percent of county spending. These county funds consist of property taxes and various property tax aids. Because county budgeting practices vary, it is not possible to separate out the actual levy from the aids. Major county aids include county program aid and the market value credit.

Table 2

	Social Service Categories						
	Total	Childrens	Child Care	Chemical Dependency	Mental Health	Dev. Disabilities	Adult
Amount (millions)							
Federal	1,184	122	177	38	94	503	249
State	1,324	110	108	59	257	505	286
County	478	214	4	34	123	56	47
Miscellaneous	65	22	2	4	15	2	20
	3,051	468	290	135	490	1,066	601
Share (percent)							
Federal	39%	26%	61%	28%	19%	47%	41%
State	43%	24%	37%	44%	52%	47%	48%
County	16%	46%	1%	25%	25%	5%	8%
Miscellaneous	2%	5%	1%	3%	3%	0%	3%

Because of many factors, there is a great deal of variation among counties in social services spending. Certainly demographics plays a role and will play a greater role in the future as many counties see little growth in the younger age cohort and explosive growth in the number of elderly. Low incomes and poverty are drivers. Some small counties can experience volatility in costs driven by a few high cost individuals or families that drive their costs. There are large variations across counties in the cost per unit of service, and in the accessibility and quality of mandated services.

Looking at five of the six social services categories there is great variation in cost by county when measured by per capita costs. Comparing the 25th percentile county per capita cost with the 75th percentile within these categories shows the extreme variability. Except for the “adult services” category the 75th percentile is generally twice or more of the 25 percentile. For adult services the disparity is over three times.

³ Article 1 of Laws 1989, 1st Special Session, Chapter 1 included a requirement for assessment of mandates and selective assumption of local government costs but was repealed and never implemented.

Table 3 Distribution of Per Capita Social Services Costs.
Local Share: Minnesota Counties 2008*

	Children's Services Costs	Chemical Dependency Costs	Mental Health Costs	DD Costs	Adult costs
Median	36.3	5.8	23.4	7.8	5.7
MAX	101.6	20.8	116.1	26.5	35.9
MIN	8.3	0.0	0.0	0.5	0.0
25%	26.5	4.0	15.6	4.4	2.6
75%	52.0	8.7	31.6	10.3	9.2

* Cost data is on a cash basis; timing of expenditures and revenues This can result in 0 or negative expenditures for a county in a particular year.

Equalization: Disparate Tax Capacities

As part of this report the Department of Revenue has provided analysis of the components of county social services costs. The Department calculated an “equalized county share” for each county based on their 2008 local share from the county cost report but equalized based on each county’s adjusted net tax capacity. This analysis also calculated how tax rates would change as well as the change in property tax to the average homestead. (Table 4) Additional tables are included in the appendix.

From this analysis we can infer the shifting of tax burden that would occur under a more equalized system if there is no change in spending patterns. The chart below represents the per capita cost change that would occur if an equalized levy were applied to current local share spending. Counties with reduced per capita amount gain from their levies being equalized. Counties with an increase are supporting spending in other counties through an equalized levy.

Per Capita Change - Current vs Equalized Local Share

In fact, a statewide equalized levy would not work in this way. Rather, the statewide levy would support the human service program local shares directly and could be distributed across all counties with less wealthy counties with high per capita costs benefiting the most.

Principles for the New System

Paraphrasing the statute, the new county property tax system should follow these principles:

- Adequate – Ensures that counties have resources to serve their current and future caseloads;
- Stable and predictable– Resources do not vary greatly from year to year and variations will be mitigated;
- Transparent – Statewide consolidated property tax contribution shall be understood by taxpayers and its relationship to the county’s local property tax should be clear;
- Simple to administer.

The study criteria in statute suggest that the goal of the funding model is to:

- maintain current services
- ensure that all eligible citizens have equal access to mandated services
- provide that increased county contributions distinguish between the state and county portion of the levy.
- provide mechanisms that mitigate property tax increases.

It appears unlikely that these goals could be met without additional funding.

Possible Approach: Children and Community Service Grant Aid and Levy

Currently, the largest general aid program for county social services is the Children and Community Services Grant program under Minnesota Statutes 256M. This program provides assistance to counties for a broad range of social services programs. Administratively, the program has an infrastructure that reviews and approves county social services plans, measures program outcomes and tracks spending in detail and according to the major social services categories.

The basic approach would be to set a formula for growth in county aid under CCSA that would tilt the aid growth toward counties with higher local costs for human services and less property wealth. The statewide levy would be gradually increased and a portion of the levy would be initially reserved for extraordinary circumstances. The increased aid could also be segmented toward the major cost categories and increased in the same manner.

For 2011, the CCSA program has been un-allotted. Funding would need to stabilize before it could be a vehicle for equalizing local human services costs.

Unintended consequences: Potential Impact on Overall Service Utilization and Statewide Costs

One effect of the current system of county shares is to suppress utilization of certain services, such as chemical and mental health services. If the county share were based on taxable capacity or any other basis that would no longer be tied to service utilization, we can expect to see increased service utilization and increased costs in currently underserved areas. This effect could be substantial. Unless funds could be obtained from other sources, these increased costs would be spread out across all counties through the new consolidated property tax.

An alternative to new funding might be reductions in funding for counties that currently provide more services than average. Part (b) of the authorizing legislation states :”Efforts to control state and county costs and service utilization rates shall focus on eligibility, level of difficulty, and other programmatic priorities.” This option has to be evaluated within the current budget environment. During recent

years, all counties and the state have addressed repeated budget deficits through continual reviews of all costs and services. All counties have already made significant reductions and will probably need to make additional reductions to address the latest budget deficit. In this environment, additional reductions for some counties in order to shift funds to “underserved” counties are probably not a realistic option.
