

Subject Incentive programs report

Authors Vang and others

Analyst Megan Mullenbach

Date April 9, 2026

Summary

This bill adds additional information that the Minnesota Department of Agriculture (MDA) must submit to the legislature in their annual report on the Advanced Biofuel Production Incentive, Renewable Chemical Production Incentive, Biomass Thermal Production Incentive, and Siding Production Incentive. This would require MDA to collect the information from the producers that receive an incentive payment.

The additional information includes the producer's business structure, financial and audit information, goals and progress of job creation and equity hiring, environmental permit compliance, and intended and actual use of payments.
