

RICE LAKE'S \$3.8 MILLION REQUEST FOR SEWER AND WATER MAIN EXTENSIONS TO PREPARE FOR ROUNDABOUT CONSTRUCTION AND CITY CONNECTOR ROAD, HF 4710

Picture on left is existing roadway with proposed sewer and water mains shown in orange. Picture below is rendering of new roundabouts and city connector street. We would like to complete all underground utility work within roundabout areas prior to and in conjunction with St. Louis County starting reconstruction work in 2028.

\$3.8 million would allow us to install:

- Gravity sewer main on Martin Road
- Gravity sewer main and water main on city connector road
- Gravity sewer main on Rice Lake Road
- Water main on Martin Road (not pictured)

(Orange lines denote where new sewer and water mains will be added)
