

In response to issues and recommendations made in the November 2011, Office of the Legislative Auditor, Evaluation Report, The Legacy Amendment, the Legislature authorizes the Legislative Coordinating Commission (LCC) to spend up to \$350,000 from the Legacy Fund to design and develop a web browser based functioning prototype for the purposes of unifying the collection and submission of applications for the Legacy Fund. The prototype shall include administrative interfaces for each fund and for the LCC that assists them in their application review process, approval and oversight. These administrative interfaces shall include analytic visualizations that provide decision support by delivering information that relates to the issues detailed in the report. The functioning prototype will be made available to the LCC on or before December 31, 2013.
