

Property Tax Burden Comparison on Referendum Revenue at Different Property Wealth Levels—Pay 22 Data

The table above shows the property tax burdens at three levels of property wealth for the average amount of referendum revenue per pupil unit at each of those levels. \$567,000 of referendum market value per resident pupil unit is the current first tier equalizing factor. Districts with the highest level of property wealth generate over three times as much revenue for only 40% more effort than districts at the lowest level.
