Re: Support for HF1495 (Fischer) Mental Health Uniform Service Standards

Members of the MN House Behavioral Health Policy Division,

Thank you for the opportunity to submit written testimony regarding our three organizations' strong support for HF1495 (Fischer) which would implement the Mental Health Uniform Service Standards proposal.

We are submitting this written testimony on behalf of the three largest Mental Health service provider associations here in Minnesota. These include the Minnesota Association of Community Mental Health Programs, AspireMN, and the Mental Health Providers Association of Minnesota.

Representatives from our three service provider associations have been active in the Uniform Service Standards legislative proposal stakeholder work for the past two years. We have dedicated many hours to this process because the current mental health regulatory system needs change. Under our current mental health regulatory system, providers have to spend a great deal of time tracking down various pieces of statute and rule and variance just to determine which regulations apply to which mental health services, trying to interpret those at times confusing regulations, and often having to follow up with regulatory agencies about how to proceed when some of those regulations are in conflict. All the time spent on all these activities is time that providers can't spend delivering high quality mental health services to clients. Our hope is that by moving to the unified licensing framework for mental health services proposed in this bill, providers will have a more transparent and uniform system of standards to operate within that will better support their goal of increasing access to high quality mental health care for Minnesotans.

It has been very valuable to have stakeholders from the Department of Human Services, the provider community, counties and the advocacy community come together to provide input on this proposal with the shared end goal of improving access to high quality mental health services for Minnesotans. We have appreciated the collaborative process and look forward to continuing the collaboration as this bill is revised as it moves through the legislative process as well as in future legislative sessions when we return with further improvements.

We would like to thank this committee for the multiple discussions you have had on this bill. Regulatory details and processes are not always the most exciting of legislative reforms, but they truly impact the experience of Minnesotans navigating the mental health service system. We ask for your support of HF1495.

Sincerely,
