Memorandum of Support for Right to Repair Legislation, HF 1156:

My name is Steve Studley and I am the CEO for Trident Computer Resources, Inc. Our company provides maintenance services for enterprise level computers and storage devices worldwide with headquarters in Eatontown, New Jersey and twelve offices throughout the USA. In order to perform our work, we need to be able to OEM certified spare parts and repair manuals which are increasingly difficult to access and restricted by the OEM.

Right to Repair legislation would make our work more accessible, and user friendly thereby improving our ability to support our customers. Our clients, who own their hardware, should have the ability to select whomever they choose to maintain the systems to best support their needs.

We urge you to pass enabling legislation as soon as possible in 2022.

Sincerely,

TRIDENT COMPUTER RESOURCES, INC.

Steve Studley

CEO
