87.29 Subd. 5a. **Type and amount of assistance.** (a) For a governmental unit receiving
 87.30 grant funding from the USDA/RECD, the authority may provide assistance in the form
 87.31 of a grant of up to 65 percent of the eligible grant need determined by USDA/RECD. A
 87.32 governmental unit may not receive a grant under this paragraph for more than \$4,000,000
 87.33 \$5,000,000 per project or \$15,000 \$20,000 per existing connection, whichever is less,
 87.34 unless specifically approved by law.

44.14 (b) For a governmental unit receiving a loan from the clean water revolving fund
 44.15 under section 446A.07, the authority may provide assistance under this section in the form
 44.16 of a grant if the average annual residential wastewater system cost after completion of the
 44.17 project would otherwise exceed 1.4 percent of the median household income of the project
 44.18 service area. In determining whether the average annual residential wastewater system
 44.19 cost would exceed 1.4 percent, the authority must consider the total costs associated with
 44.20 building, operating, and maintaining the wastewater system, including existing wastewater
 44.21 debt service, debt service on the eligible project cost, and operation and maintenance
 44.22 costs. Debt service costs for the proposed project are calculated based on the maximum
 44.23 loan term permitted for the clean water revolving fund loan under section 446A.07,
 44.24 subdivision 7. The amount of the grant is equal to 80 percent of the amount needed to
 44.25 reduce the average annual residential wastewater system cost to 1.4 percent of median
 44.26 household income in the project service area, to a maximum of ~~\$4,000,000~~ \$5,000,000 per
 44.27 project or ~~\$15,000~~ \$20,000 per existing connection, whichever is less, unless specifically
 44.28 approved by law. The eligible project cost is determined by multiplying the total project
 44.29 costs minus any other grants by the essential project component percentage calculated
 44.30 under subdivision 3, paragraph (c), clause (1). In no case may the amount of the grant
 44.31 exceed 80 percent of the eligible project cost.

44.32 (c) For a governmental unit receiving a loan from the drinking water revolving
 44.33 fund under section 446A.081, the authority may provide assistance under this section in
 44.34 the form of a grant if the average annual residential drinking water system cost after
 44.35 completion of the project would otherwise exceed 1.2 percent of the median household
 44.36 income of the project service area. In determining whether the average annual residential
 45.1 drinking water system cost would exceed 1.2 percent, the authority must consider the total
 45.2 costs associated with building, operating, and maintaining the drinking water system,
 45.3 including existing drinking water debt service, debt service on the eligible project cost,
 45.4 and operation and maintenance costs. Debt service costs for the proposed project are
 45.5 calculated based on the maximum loan term permitted for the drinking water revolving
 45.6 fund loan under section 446A.081, subdivision 8, paragraph (c). The amount of the grant
 45.7 is equal to 80 percent of the amount needed to reduce the average annual residential
 45.8 drinking water system cost to 1.2 percent of median household income in the project
 45.9 service area, to a maximum of ~~\$5,000,000~~ \$5,000,000 per project or ~~\$20,000~~ \$20,000 per existing connection,
 45.10 whichever is less, unless specifically approved by law. The eligible project cost is
 45.11 determined by multiplying the total project costs minus any other grants by the essential
 45.12 project component percentage calculated under subdivision 3, paragraph (c), clause (1). In
 45.13 no case may the amount of the grant exceed 80 percent of the eligible project cost.

45.14 (e) (d) Notwithstanding the limits in paragraphs (a) and (b), and (c), for a
 45.15 governmental unit receiving supplemental assistance under this section after January 1,
 45.16 2002, if the authority determines that the governmental unit's construction and installation
 45.17 costs are significantly increased due to geological conditions of crystalline bedrock or karst
 45.18 areas and discharge limits that are more stringent than secondary treatment, the maximum
 45.19 award under this section shall not be more than \$25,000 per existing connection.

87.35 (b) For a governmental unit receiving a loan from the clean water revolving fund
 87.36 under section 446A.07, the authority may provide assistance under this section in the form
 88.1 of a grant if the average annual residential wastewater system cost after completion of the
 88.2 project would otherwise exceed 1.4 percent of the median household income of the project
 88.3 service area. In determining whether the average annual residential wastewater system
 88.4 cost would exceed 1.4 percent, the authority must consider the total costs associated with
 88.5 building, operating, and maintaining the wastewater system, including existing wastewater
 88.6 debt service, debt service on the eligible project cost, and operation and maintenance
 88.7 costs. Debt service costs for the proposed project are calculated based on the maximum
 88.8 loan term permitted for the clean water revolving fund loan under section 446A.07,
 88.9 subdivision 7. The amount of the grant is equal to 80 percent of the amount needed to
 88.10 reduce the average annual residential wastewater system cost to 1.4 percent of median
 88.11 household income in the project service area, to a maximum of ~~\$4,000,000~~ \$5,000,000 per
 88.12 project or ~~\$15,000~~ \$20,000 per existing connection, whichever is less, unless specifically
 88.13 approved by law. The eligible project cost is determined by multiplying the total project
 88.14 costs minus any other grants by the essential project component percentage calculated
 88.15 under subdivision 3, paragraph (c), clause (1). In no case may the amount of the grant
 88.16 exceed 80 percent of the eligible project cost.

88.17 (c) For a governmental unit receiving a loan from the drinking water revolving
 88.18 fund under section 446A.081, the authority may provide assistance under this section in
 88.19 the form of a grant if the average annual residential drinking water system cost after
 88.20 completion of the project would otherwise exceed 1.2 percent of the median household
 88.21 income of the project service area. In determining whether the average annual residential
 88.22 drinking water system cost would exceed 1.2 percent, the authority must consider the total
 88.23 costs associated with building, operating, and maintaining the drinking water system,
 88.24 including existing drinking water debt service, debt service on the eligible project cost,
 88.25 and operation and maintenance costs. Debt service costs for the proposed project are
 88.26 calculated based on the maximum loan term permitted for the drinking water revolving
 88.27 fund loan under section 446A.081, subdivision 8, paragraph (c). The amount of the grant
 88.28 is equal to 80 percent of the amount needed to reduce the average annual residential
 88.29 drinking water system cost to 1.2 percent of median household income in the project
 88.30 service area, to a maximum of ~~\$5,000,000~~ \$5,000,000 per project or ~~\$20,000~~ \$20,000 per existing connection,
 88.31 whichever is less, unless specifically approved by law. The eligible project cost is
 88.32 determined by multiplying the total project costs minus any other grants by the essential
 88.33 project component percentage calculated under subdivision 3, paragraph (c), clause (1). In
 88.34 no case may the amount of the grant exceed 80 percent of the eligible project cost.

88.35 (e) (d) Notwithstanding the limits in paragraphs (a) and (b), and (c), for a
 88.36 governmental unit receiving supplemental assistance under this section after January 1,
 89.1 2002, if the authority determines that the governmental unit's construction and installation
 89.2 costs are significantly increased due to geological conditions of crystalline bedrock or karst
 89.3 areas and discharge limits that are more stringent than secondary treatment, the maximum
 89.4 award under this section shall not be more than \$25,000 per existing connection.

45.20 Subd. 5b. ~~Special assessment deferral.~~ A governmental unit receiving a loan
 45.21 under subdivision 5a that levies special assessments to repay the loan under subdivision
 45.22 5a or section 446A.07 may defer payment of such assessments under the provisions of
 45.23 sections 435.193 to 435.195.

 46.5 rejected, or the authority has determined that the potential funding is unlikely.

46.6 Subd. 9. **Funding limitation.** Supplemental assistance may not be used to reduce
 46.7 the sewer service charges of a significant wastewater contributor industrial user that has a
 46.8 separate service charge agreement with the recipient, or a single user that has caused the
 46.9 need for the project or whose current or projected flow and load exceed usage exceeds
 46.10 one-half of the current wastewater treatment plant's or drinking water system capacity.

46.11 Subd. 11. **Report on needs.** By February 1 of each even-numbered year, the
 46.12 authority, in conjunction with the Pollution Control Agency and the commissioner of

89.5 Subd. 5b. ~~Special assessment deferral.~~ A governmental unit receiving a loan
 89.6 under subdivision 5a that levies special assessments to repay the loan under subdivision
 89.7 5a or section 446A.07 may defer payment of such assessments under the provisions of
 89.8 sections 435.193 to 435.195.

89.9 Subd. 6. **Disbursements.** Disbursements of grants or loans awarded under this
 89.10 section by the authority to recipients must be made for eligible project costs as incurred by
 89.11 the recipients, and must be made by the authority in accordance with the project financing
 89.12 agreement and applicable state and federal laws and rules governing the payments.

89.13 Subd. 7. **Loan repayments.** Notwithstanding the limitations set forth in section
