Bill Description

This bill amends existing body piercing laws.

Section 1 expands the definition of supervision to include definitions of direct supervision and indirect supervision of piercers who are in training.

Section 2 adds new requirements relative to supervised experience and safety training for all piercers after January 1st 2017.

Section 3 requires the Commissioner of Health to notify a licensed technician 60 days before a license expires.

Section 4 adjusts an internal statutory reference to align with the amendments.

Section 5 requires that person applying for a body piercing technician license or a dual body art technician license must complete a minimum of 250 body piercings under direct supervision and 250 under indirect supervision.

Section 6 clarifies that the identification requirement in subdivision 1 of §146B.01 applies only to clients who state they are over 18 years of age.

Section 7 sets consent and identification requirements when an individual under the age of 18 seeks to be pierced.

Assumptions

Relative to the 1E version, the amendment removes language prohibiting piercing techniques, which eliminates the need for added investigation and enforcement activity. The remaining language establishes a new requirement for a person applying for a body piercing technician license or a dual body art technician license. It requires the completion of a minimum of 250 body piercings under direct supervision and 250 piercings under indirect supervision. The licensing requirements for this change are similar functions currently performed by MDH staff, therefore there is no fiscal impact to the bill as amended.

Expenditure and/or Revenue Formula
