**PURPOSE**

The Minnesota Board of Dietetics and Nutrition Practice protects the public through licensure of dietitians and nutritionists, establishment of continuing education standards, and investigation and resolution of complaints against licensees and unlicensed persons engaging in the practice. The Board was established in 1995 under the authority of Minnesota Statutes, Chapter 148 and Rules 3250.

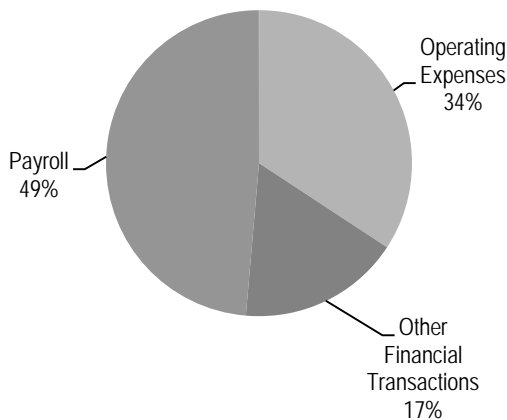

The mission of the Board is to:

- Ensure that all licensees meet the educational and practical requirements specified in law
- Ensure that all licensees provide competent dietetic and nutrition care
- Set standards for quality dietetic and nutrition services
- Promote the public's interest in receiving quality dietetic and nutrition services

The Board of Dietetics and Nutrition Practice contributes to the statewide outcomes of **people in Minnesota are safe, all Minnesotans have optimal health, and efficient and accountable government services.**

The Minnesota Board of Dietetics and Nutrition Practice has a total annual budget of \$110,000. The Board is entirely funded by fees that are deposited in a non-dedicated special revenue fund. The Minnesota Legislature grants the Board authority to use this fund to pay operating costs. The Board receives no General Fund dollars.

**STRATEGIES**

The Board accomplishes its mission through implementation of the following strategies:

- Minnesota is similar to 47 other states in that it requires licensing or certification of dietitians and nutritionists. Board reviews of initial licensure applications ensure that licenses are granted only when education, pre-professional experience and national exam requirements are met. License renewals ensure that current licensees have completed the required hours of continuing education.
- The Board's Complaint Resolution Committee (CRC) receives, investigates and resolves complaints regarding the conduct or standard of care provided by licensees. The CRC also receives complaints of unlicensed individuals engaging in the practice and has the authority to issue Cease and Desist Orders.
- The Board promotes awareness of best practices in the profession. An example of this is passage last year of our prescription protocol initiative. This allowed Minnesota to be one of a handful of states that does not have any statutory or regulatory impediments to the Centers for Medicare and Medicaid Services (CMS) new rule allowing qualified dietitians and nutritionists hospital privileges to order therapeutic diets without physician supervision or approval. This rule has been cited by CMS for improving quality of care and saving \$459 million per year nationally.
- The Board is committed to technology upgrades that promote public protection and responsible, efficient, and cost-effective services. These upgrades, such as online applications, have allowed us to absorb a 9% increase in license renewals and a 27% increase in new licenses over the past two years with the same amount of staff.

The seven-member Board of Dietetics and Nutrition Practice (3 public members, 2 licensed dietitians, and 2 licensed nutritionists) set direction for the Board and oversee the agency's activities.

## FY16-17 Biennial Budget Change Item

### Change Item Title: Operating Adjustment

Expenditures	0	0	0	0
Revenues	0	0	0	0

### Recommendation:

The Governor recommends additional funding for compensation related costs associated with the delivery of agency services. This amount represents an annual increase of 1.8% for General Fund compensation costs.

### Rationale/Background:

Each year, compensation costs rise due to labor contract settlements, and changes in employer-paid contributions for insurance, FICA, Medicare, retirement, and other factors. Absorbing this increase in compensation costs within existing agency base appropriations results in reduced staffing and/or reduced non-compensation spending.

### Proposal:

The Governor recommends increasing agencies' general fund budgets for employee wage and benefit costs by 1.8% per year for FY 2016-17. Agencies were instructed to include a 1.8% increase to total compensation each year in their base budgets, based upon the compound annual compensation spending rate increase per FTE over the last ten years for executive branch employees. This recommendation is intended to allow agencies to maintain their current level of agency operations.

For non-General Fund direct appropriated funds, the Governor's budget recommendations also include an adjustment of 1.8% per year, where the amount can be supported by the source of revenue.

### Results:

This proposal is intended to allow agencies to continue to provide current levels of service and information to the public.
