Mr. Chair,

If you could speak with case managers and staff that sits in groups and actively work with the excluded offenders of this bill you will hear more on how this bill will be more beneficial for the masses and a waste of time for the few.

At some point violent offenders will be back with the general public and the things within this bill is most effective with those.

When you work to become a better person, it becomes a habit, a habit that is passed onto the new. All in all prison will become a place where each one teaches one to become a better person, which can develop into a common goal of ours.

We appreciate you for taking the time to listen.
