Multiple Races	13,230	31,281	18,051	58%
Hispanic or Latino	35,508	53,765	18,257	34%
Total	662,991	731,958	68,967	9%

Changes in Data Collection

- Changes to the race and ethnicity questions on the 2020 Census allowed for more opportunity to write in racial and ethnic groups.
- This has painted a better picture of how individuals view themselves, which in turn has shown that we are a more multiracial society than previous data has been able to show.
- While not solely responsible for the changes, it has corresponded with an increase in the “Some other race” and Multiple race categories.

Other Data Considerations

- The 2020 Census was conducted during a world-wide pandemic, which required the Census Bureau to make several adjustments to the operational plan.
- There was unprecedented uncertainty regarding aspects of the Census—even before the pandemic—that caused concern regarding individuals' willingness to respond to the Census.
- This is the first census to implement Differential Privacy (DP) as the Disclosure Avoidance System (DAS) to protect respondents' confidentiality.

Thank you again!
