Chair Zach Stephenson

Commerce Finance and Policy Committee State Office Building, Room 10 100 Rev Dr Martin Luther King Jr Blvd St. Paul, MN 55155

Dear Chair Stephenson and Committee Members,

The undersigned are writing to express support for the Minnesota Age Appropriate Design Code.

Children and teens are facing an unprecedented mental health crisis. Even before the onset of COVID-19 and subsequent social distancing and isolation, teen suicide was on the rise; the <u>CDC found</u> that between 2007 to 2017 the suicide rate among people aged 10 to 24 across the US increased by 56%. And in the year between spring of 2020 and 2021 emergency room visits for girls ages 12 to 17 <u>increased by 50%</u>. In Minnesota, <u>57,000</u> <u>Minnesotans age 12-17 have depression</u> and 59.3% of those youth with depression did not receive any mental health care in the last year.

In 2020, <u>81% of 14 to 22-year-olds</u> said they used social media either "daily" or "almost constantly." This is by design. As private companies beholden to shareholders, performance incentives for product developers and executives are tied to profit and therefore time spent on their platform. Social media platforms and tech companies do not design these services with their youngest and most vulnerable users in mind. Ensuring the safety of tech products is long overdue. We have nutrition labels on food packaging, rigorous testing for cribs and car seats, and yet the technology children use daily from the youngest of ages have little to no safeguards. As a result:

- 75% of the top social media platforms <u>use AI to recommend children's profiles to</u> <u>strangers</u>.
- 95% of the commonly downloaded apps marketed to or played by children 5 and under contain at least <u>one type of advertising, including advertising that is</u> <u>age-inappropriate</u>.
- 60% of school-based apps <u>share kids' data with third parties</u>.
- A leaked internal survey found that Instagram <u>"makes body image issues worse</u> for one in three teen girls" and that 6% of US teens link their interest in suicide directly to the platform.

More than 80% of Americans say they want legislation that requires social media platforms to <u>take action to minimize harms to minors</u>. We agree with President Biden, who in his State of the Union address said that "we must hold social media platforms

accountable for the national experiment they're conducting on our children for profit." Minnesota has the opportunity to lead the nation in protecting our children online and prioritizing well-being over profit, childhood over exploitation.

And we know the framework behind the Minnesota Age Appropriate Design Code works. In September 2021, the <u>Age Appropriate Design Code</u> went into effect in the UK. Since then, tech companies have made changes to products that children use to ensure their data isn't needlessly collected, they are not deceived by manipulative design and that product design is not detrimental to their health and well-being. We call on Minnesota lawmakers to put children's interests ahead of those of the tech industry by supporting the Age Appropriate Design Code.

Sincerely,

Minnesota Chapter
