

Dear Representatives,

I am writing to you as a 10-year homeschooling parent who lives in Blaine, Minnesota. We want to voice our concerns regarding the language of HF874. As written, the proposed changes could directly impact my ability to homeschool my four children. We greatly value home education and take our children's education very seriously. We oppose any changes to the State constitution that impacts our ability to home educate.

We understand that need for quality public education for all students who desire public education, but we do not wish to see public education reforms at the expense of private or home education.

Sincerely,

Brenda Krotzer
