1.1   .... moves to amend H.F. No. 222, the delete everything amendment

1.2   (H0222DE7), as follows:

1.3   Page 5, after line 16, insert:

1.4   "(d) All systems within the automated license plate reader data environment, and all

1.5   systems with connectivity to the internet also used to access automated license plate reader

1.6   data environments, must have host-based firewall, anti-malware, intrusion prevention

1.7   systems, and file integrity monitoring software installed and properly configured and

1.8   functioning. Automated license plate reader data must be encrypted anywhere it is stored,

1.9   including on portable digital media, backup media, and in data logs."
