The 2020 Census is about:

POWER

MONEY

DATA

Census counts guide the distribution of dollars

- ▶ **800 billion** federal dollars are distributed to state and local governments **each year** on the basis of census data
- ▶ At least **\$2,796** per person is allocated by the federal government to Minnesota each year (that's **\$28,000** for the decade)

The Census must count every person living in the United States on April 1, 2010.

Before you answer Question 1, count the people living in this house, apartment, or mobile home using our guidelines.

- Count all people, including babies, who live and sleep here most of the time.

The Census Bureau also conducts counts in institutions and other places, so:

- Do not count anyone living away either at college or in the Armed Forces.
- Do not count anyone in a nursing home, jail, prison, detention facility, etc., on April 1, 2010.
- Leave these people off your form, even if they will return to live here after they leave college, the nursing home, the military, jail, etc. Otherwise, they may be counted twice.

The Census must also include people without a permanent place to stay, so:

- If someone who has no permanent place to stay is staying here on April 1, 2010, count that person. Otherwise, he or she may be missed in the census.
