

City of Little Canada, MN

COMMUNITY CONNECTIVITY PROJECT

As part of the Little Canada Community Connectivity Project, the City is requesting funding to reconstruct Ramsey County Road 21 (Little Canada Road) with congestion, safety, and connectivity enhancements, reconstruct the intersection of County Road C and Little Canada Road as a roundabout, and construct a roundabout at the intersection of Little Canada Road and County Drive. Separately, the City is also seeking funding to construct a pedestrian bridge across Interstate 35 from County Drive to Ramsey County Road 19 (Centerville Road).

Little Canada Road (CSAH 21) is an A Minor Arterial Augmentor. It serves as the city’s main east/west commercial corridor and connects the neighborhoods, commercial destinations, parks, and trails of western Little Canada to the community centers, schools, employment centers, parks, and trails of eastern Little Canada.

Today, travel in the project area is dangerous. The Little Canada Road/I-35E ramp intersection has a critical crash index of 1.18, above the average for similar intersections. The construction of two roundabouts in the project area is expected to reduce crashes by more than 48%, reduce serious injury crashes by 52%, and eliminate several conflict points. The lane reduction and new median will slow traffic and further reduce crashes by improving vehicle sight lines.

Legend

- County Road C Reconstruction

4-3 Conversion W/ Pedestrian Improvements, Awarded 2026 HSIP Funding

- County Road C/Little Canada Road/Lake Shore Avenue Intersection

AWS to Roundabout Conversion, Awarded 2026 HSIP Funding

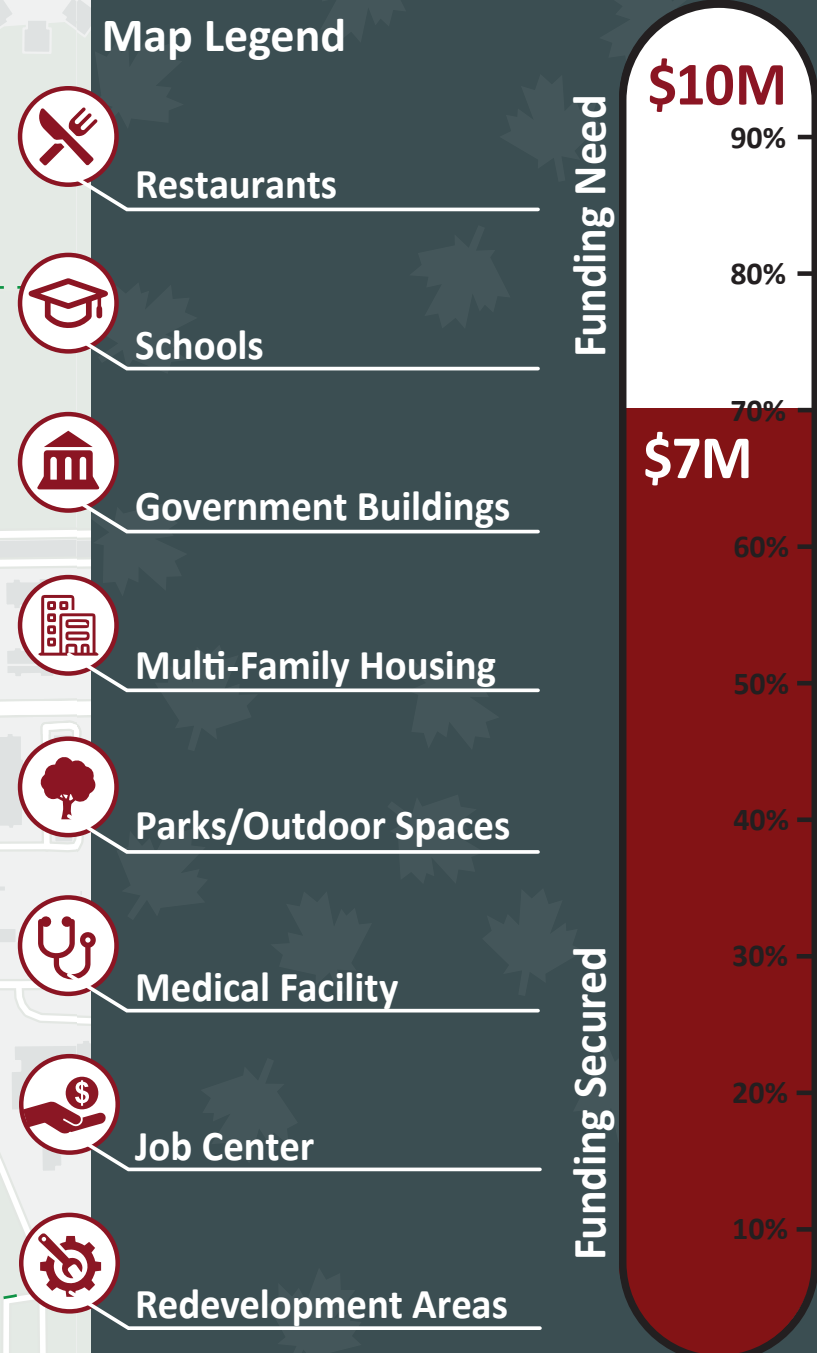

- Little Canada Road/Country Drive Intersection

Realignment & Roundabout, Awarded 2024 Regional Solicitation and 2024 LRIP Funding

- Trails

- Local Bus Route 71
