

TESTIMONY FOR HOUSE GOV FINANCE HEARING ON VOTE BY MAIL

Vote by Mail is going to save us so much money in the long run. It will save us money on polling places. It will save us money paying for people contracting Covid by trying to go to the polls and then cause medical expenses clogging the hospitals. Let's get smart and provide safe voting access to people rather than doing the dumb thing and paying for all the problems that arise from setting people up for infection. Vote by mail sets people up to keep themselves safe because they automatically have the vote by mail form sent to them. It is easy for people and that will save us money in the long run. This is done in other states and does not cause problems and saves money. It is time to do the right thing.
