$1 million increase for FQHCs

Minnesota Association of COMMUNITY HEALTH CENTERS

Data Analytics
- Assess patient population to identify "high-risk" patients for care coordination.

Care Coordination
- Hire staff to provide robust care coordination for patients with chronic conditions in order to reduce unnecessary ER use and inpatient hospitalization.

Expanded Access
- Integration of behavioral health and primary care.
- Enabling services.

Oral Health
- Address significant "wait lists" through expansion of mobile dentistry and hiring of dental provider staff.
