

I write to support meaningful police reforms in Minnesota, specifically HF1104, HF640, and HF1103. We have seen time and again that more work needs to be done to ensure that all Minnesotans are protected and served by police. The killing of Daunte Wright this past week at the hands of police is a continual reminder of the ways that Black people are disproportionately harmed by police. As a Minneapolis resident, I have witnessed the devastating impacts of George Floyd's murder on our community and in particular, on our communities of color. Please take action steps, including supporting legislation to eliminate qualified immunity for police, provide civilian oversight of police, and prohibit law enforcement from altering police camera footage of deadly incidents. The time is now - we can't wait to make these meaningful reforms.

Sincerely,
Alison Moore
Minneapolis resident - House District 62B
