

Subject Specialized community mental health center grant

Authors Moran and others

Analyst Sarah Sunderman

Date February 21, 2022

Summary

This bill appropriates \$2,950,000 in fiscal year 2023 from the general fund to the commissioner of human services for a grant to mental health providers to establish a community mental health center that provides specialized services for African American children and families. The bill specifies the types of services the center must offer, and requires the center to serve all ages, regardless of ability to pay or residency. The appropriation would be added to the base funding for each year, through fiscal year 2027.
