

I am sending this email because of the DNR stop movement on farmed deer last fall. Because this movement was in place I was forced to hold deer over that would have been sold to a MN harvest ranch. I had 3 bucks that were scheduled to get sold and was not able to sell them because of the need to stay in state, and thus the stop movement restricted that sale. Because this stop was in place at the beginning of October and these bucks had the racks on I lost 2 of the 3 because I was holding them for sale and just before deciding to cut the antlers off 2 were killed getting caught up in the fence. This would not have happened if this stop was not in place. The value I lost because of this stop movement was \$6200.00 for the 2 bucks, (a 219 inch buck and 155 inch buck. I was able to get 1 of these bucks cut off and save him after these 2 died.
