Date March 9, 2022

Summary

House File 2200 establishes a program in the Pollution Control Agency to award grants to cities, nonprofit organizations, or educational institutions to assist cities to reduce their contributions to the causes of climate change or to mitigate the impacts of climate change. The maximum grant amount is \$50,000. Cities whose population exceeds 20,000 must match a state grant dollar-for-dollar, while the match requirement for smaller cities is 5 percent. \$5,000,000 is appropriated in FY 2022 for the grant program.
