

Caleb (9)
 I love Roblox, games, swimming and math. I'm very focused, inquisitive and intentional in my actions.

Dunky (7)
 I love Roblox, swimming, things in order, long sleeves and pants. I get nervous and frustrated quite easily.

Our Disease
 We have Duchenne Muscular Dystrophy. We are lacking a protein called dystrophin which is essential for muscle growth. They say we will be wheelchair bound within years and will have an abbreviated life.

Our Bodies
 Our muscles are special and don't work like normal as they are weakening with every move. What we could do today, we might not be able to do tomorrow. Our bones are brittle because of my medicine. If you see us struggling, please don't force us to keep trying, just help us. If we get tired, let us take a break. We always need an alternative mobility device available to us. Stairs and climbing are difficult, dangerous and hard on my body. The cold weather is hard on our muscles, but we like fresh air. Crowds are hard because one accidental bump means we may fall to the ground and this could take us off our feet forever.
