Date March 13, 2026

Summary

This bill would reduce the number of senators from 67 to 45 and increase the number of representatives from 134 to 135 effective January 3, 2033 (i.e., after the next decennial census and the redistricting process that follows). This would result in an odd number of members in each house of the legislature, and three house of representatives districts nested within each senate district.
