Bill Description

Section 2 of this bill amends MS 326B.163 by adding subdivision 5a. which creates the definition for a “platform lift” as a powered hoisting and lowering device designed to transport mobility-impaired persons on a guided platform.

Section 3 of this bill amends MS 326B.164 Subd. 13 by adding licensing exemptions for contractors or individuals when performing work on conveyors, including vertical reciprocating conveyors; dock levelers; and platform lifts not covered under MS 326B.163 Subd. 5a.

Assumptions

The department assumes no fiscal impact due to the exemptions from license requirements. Licensed elevator contractors could/would continue to obtain elevator installation permits for these devices because they are allowed to perform all electrical wiring associated with these installations under the elevator laws. Those who are not licensed as elevator contractors could install exempt devices but would still be required to obtain an electrical permit for wiring performed as part of the installation.
