Dear Representative Kaluza

Thank you for your work in this most important issue of our Country, and our State of Minnesota

I have been a member of the Dakota County Elections Integrity Group since its beginnings, February 2021. This group formed soon after the obvious blatant election fraud our State and Country experienced in the 2020 election

We as a group spent many hours working together and researching our information with the help of amazing dedicated IT specialists

We spent many Tuesday mornings at the Dakota County Commissioners Meetings appealing to them to please allow fair and equitable voting to us citizens. Presenting to them the evidence of fraud within our County

Our efforts and requests and many expert documents fell on deaf ears. Blank faces staring back as we spoke. Some rude commissioners scrolling through their phones, while we were presenting. Allowing us to speak for formality purposes only, yet not caring.

We have been requesting paper voter-roll log ins, one day voting, no mail-in ballots or drop off boxes, etc.

I could not understand the empty responses from those we confronted until I came to the conclusion that those in power know about the fraud; they know that is the only way for them to keep their position, therefore no action to address this most grievous issue that affects our entire state. I soon began to realize that they do not work for We The People, they work for a Corporation

As a result we all see the evil that has transpired in our State

As time has gone on and many patriots throughout our Country are fighting to save our Country, more and more evidence has come to the surface. I am most grateful for this!

Please realize that we American citizens have constitutional rights to vote, and therefore mail in ballots is not the same thing It is cancelling out my voice, my ballot

You cannot prove the mail-in ballots or even just registered voters are American citizens of our Counties and State

We must return to one day voting, paper watermarked ballots, photo ID and proof of citizenship, absentee ballots only for those who are traveling, to preserve our freedoms for our children and grandchildren

I pray this can come true as soon as possible to save our Republic

Thank you for your time in this most important issue before us today!

Susan Ferrozso
