

Waiver Reimagine Individual Budget Methodology Distribution

The table below provides an estimated distribution of adults across the seven support ranges*, broken out by which of the waivers people are presumed to access in the future. This table assumes waiver type according to the services people currently access.

	1	2	L	3	4	H	E	All Ranges
Residential	7%	23%	29%	11%	4%	20%	5%	39%
Independent	14%	22%	25%	11%	3%	19%	6%	61%
Total	11%	23%	27%	11%	3%	20%	5%	100%

* The table and graph below provide a brief description of each budget range.

1	Low general support need with typical health and psychosocial support needs
2	Moderate general support need with typical health and psychosocial support needs
3	High general support need with typical health and psychosocial support needs
4	Extensive general support need with typical health and psychosocial support needs
L	Low to moderate general support need with high health and/or high psychosocial support needs
H	High to extensive general support need with high health and/or high psychosocial support needs
E	Any general support need with extraordinary health and/or psychosocial support needs
